Abstract

Abstract: In a competitive research landscape, researchers can no longer afford to just publish and hope for receiving impact. To leave a mark, researchers have to take their impact into their own hands. Researchers need to keep all of their scholarly output in a database, to share through academic social networking sites. Researchers also, should create a "permalink" for each of their publications. A "permalink" is a stable, permanent (or persistent) link to an online journal article or subscription resource, that can be accessed from any computer at any time. It is often different to the URL that appears at the top of your browser - the link displayed there may be session dependent, and will only work for a particular person in a particular time period. This presentation provides guidelines on how to create a publication database for enhancing research visibility and citations.

Keywords: H-index, Improve citations, Research tools, Bibliometrics, Research Visibility

Gold Open Access Journals

- Journals that automatically and immediately make their articles available online to all at no cost (the articles are always free to read).

- Gold OA journals do not take copyright. They use Creative Commons licenses instead.

©2016-2017 Nader Ale Ebrahim

Green Open Access Journals

- Traditional, subscription-based journals that permit authors to self-archive their articles in OA repositories.

- In general, Green OA journals do take copyright, but “give back” some rights to the author.

©2016-2017 Nader Ale Ebrahim

Traditional Toll Access Journals

Subscription-based journals that require authors to transfer copyright to the Journal, which then has exclusive rights to the article.

©2016-2017 Nader Ale Ebrahim

Publishers and copyright

- Assigning copyright to a publisher does not generally mean that you cannot deposit in a repository
- Most publishers now permit authors to deposit a copy of their articles in repositories
- This is a right granted to authors over and above any copyright agreement you have signed
- However, most publishers will only allow you to deposit your ‘author final version’ of your work
- Some publishers have embargo periods, e.g. an article can only be deposited in a repository 6 months after publication

Source: Morag Greig, Enlighten: Glasgow’s University’s online institutional repository

©2016-2017 Nader Ale Ebrahim

Copyright issue

Your publication freely available

Besides the bibliographic details, you can add the publication itself to UvA-DARE, in pdf or Word. Of course, you yourself decide whether you only want to archive it (in which case the electronic version is not accessible) or if you wish to give interested researchers and readers full access to the electronic publication. There are great advantages to making it worldwide available. Publications which are freely available are most often downloaded and cited.

If your publisher does not give permission to give access to the definitive publisher's version/pdf, in many cases it is permitted to make the last author's version available (i.e. the version after peer review). This version has the same scientific content, but lacks the publisher's lay-out. More information can be found at SHERPA/RoMEO and the Open Access and Copyright site of UvA.

Springer's Self-Archiving Policy

Springer is a green publisher, as we allow self-archiving, but most importantly we are fully transparent about your rights.

Publishing in a subscription-based journal

If you publish an article in the traditional way, without open access our Copyright Transfer Statements reads (excerpt):"Authors may self-archive the author's accepted manuscript of their articles on their own websites. Authors may also deposit this version of the article in any repository, provided it is only made publicly available **12 months after official publication or later**. He/ she may not use the publisher's version (the final article), which is posted on SpringerLink and other Springer websites, for the purpose of self-archiving or deposit. Furthermore, the author may only post his/her version provided acknowledgement is given to the original source of publication and a link is inserted to the published article on Springer's website. The link must be accompanied by the following text: *"The final publication is available at link.springer.com"."*Prior versions of the article published on non-commercial pre-print servers like arXiv.org can remain on these servers and/or can be updated with the author's accepted version. The final published version (in PDF or HTML/XML format) cannot be used for this purpose. Acknowledgement needs to be given to the final publication and a link should be inserted to the published article on Springer's website, accompanied by the text "The final publication is available at link.springer.com".

CTS (for information purposes only) (pdf, 213 kB)

Publishing open access

If you publish your article open access, the final published version can be archived in institutional or funder repositories and can be made publicly accessible immediately.

Open Access at Springer

Find a stable URL

- For most e-journals, the web address ('URL') of the article that you see in the browser address bar is not stable; i.e. it may work for you right now, but it may not work tomorrow, and it might not work for other users. To make a link that will always lead your students to the correct article, you need to find a *stable URL* (also called a *persistent URL* or *permalink*).

Source: http://lti.lse.ac.uk/digital-and-information-literacy/ejournal-articles.php

©2016-2017 Nader Ale Ebrahim

Finding a permanent link

- **DOI permanent links**
  - Sometimes you will see only a DOI, and not a permanent link, when viewing the citation information for an article. A DOI is a standardized method for identifying an electronic object. DOIs often appear in the citation or the abstract of an article or even in its full-text format.
- When you have located a DOI, follow these steps to complete the link.
  - To convert the DOI to a URL, precede it with the following:
  - **http://dx.doi.org/** For example, the doi:10.1123/japa.2015-0188 becomes: http://dx.doi.org/10.1123/japa.2015-0188 This is sufficient if the article is available for free.
- **Tip:** If you cannot find the DOI of an article, try using the following tool: http://www.crossref.org/guestquery/

Source: http://library.concordia.ca/help/citing/sharing-links.php

©2016-2017 Nader Ale Ebrahim

DOAI (Digital Open Access Identifier)

http://doai.io/

DOAI (Digital Open Access Identifier) is an alternate DOI (Digital Object Identifier) resolver that takes you to a free version of the requested article, when available.

To use it, replace dx.doi.org by doai.io in any DOI link.

Examples

http://**doai.io**/10.1016/j.jalgebra.2015.09.023 vs
http://**dx.doi.org**/10.1016/j.jalgebra.2015.09.023

http://**doai.io**/10.1139/f92-220 vs
http://**dx.doi.org**/10.1139/f92-220

Who runs this

DOAI is run by CAPSH, and relies on the metadata provided by our partners, most notably the Bielefeld Academic Search Engine (BASE).

https://dx.doi.org/10.6084/m9.figshare.4040133.v1 vs
http://doai.io/10.6084/m9.figshare.4040133.v1

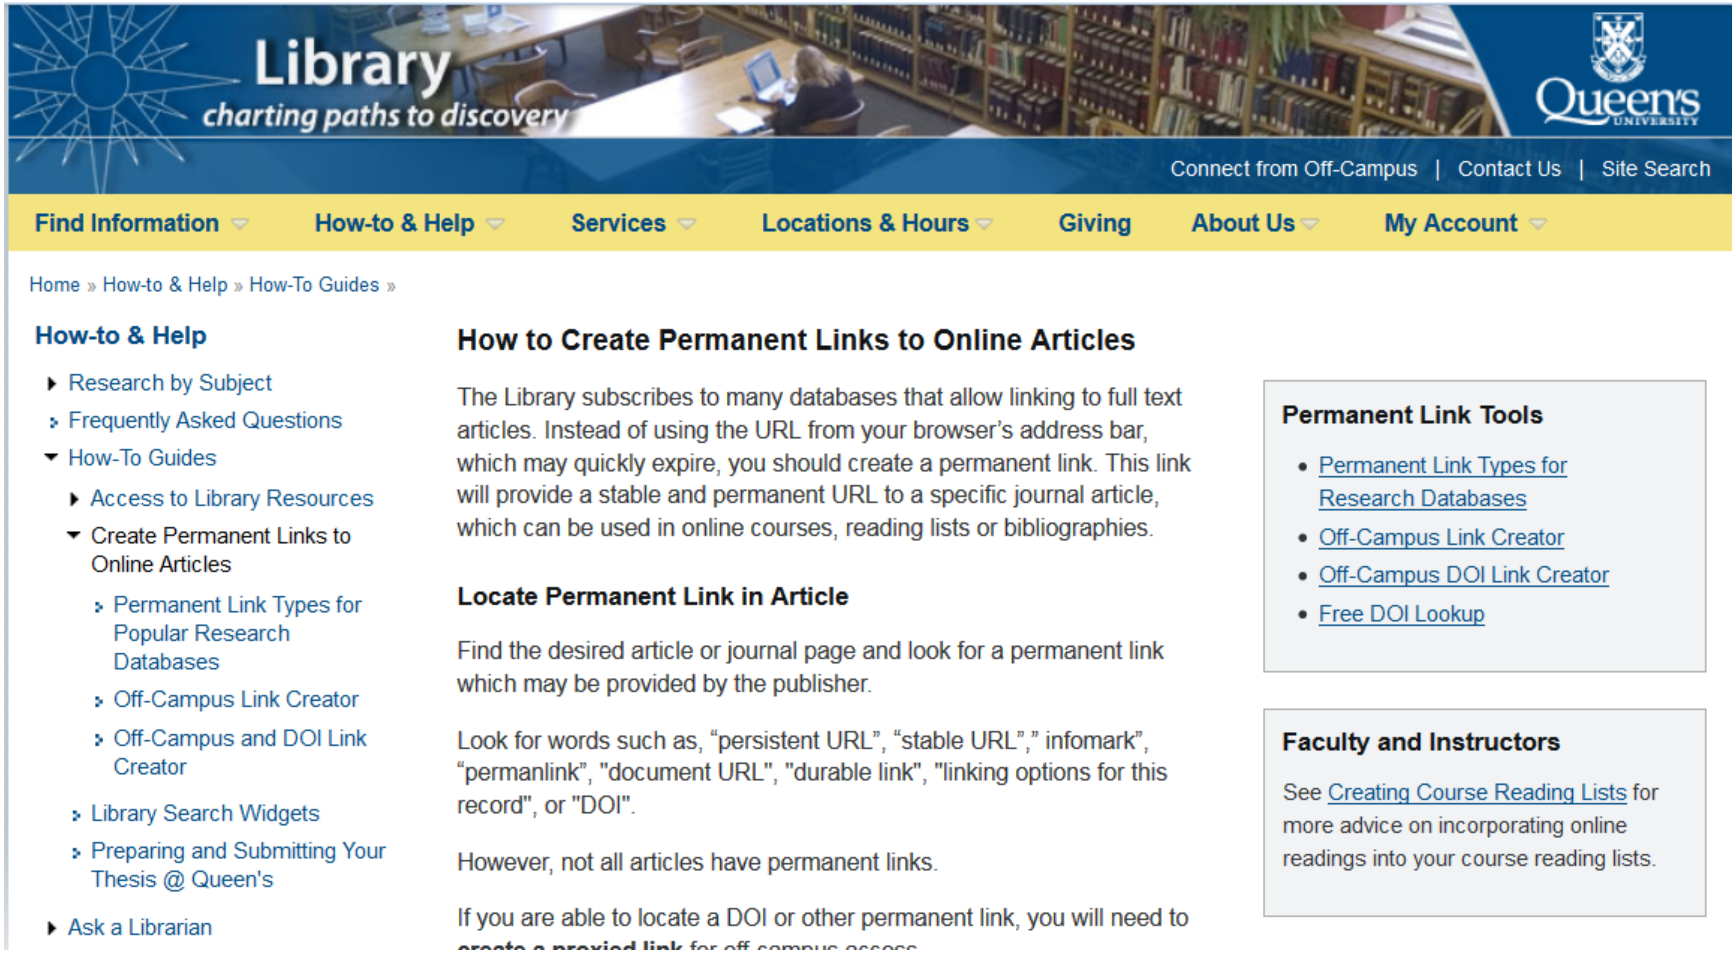
How to Create Permanent Links to Online Articles



©2016-2017 Nader Ale Ebrahim

Cloud Storage

©2016-2017 Nader Ale Ebrahim

Storage Made Easy

The Storage Made Easy Enterprise File Share and Sync solution uniquely allows IT to regain control of ‘cloud sprawl’, unifying private and public file sharing into a single, converged storage infrastructure that can easily be managed and be used to set governance and audit controls.

- Good for creating a permanent link to the publications.
- Example

©2016-2017 Nader Ale Ebrahim

Jumpshare

Imagine if every file you share could be viewed online, if every desktop, smartphone and tablet could open the files irrespective of the platform they are running. No need to download the files, no need to install third-party apps to view them. Technology should do the work for you.

- Good for open view over 200 file formats online.
- Example

Calculate Your Academic Footprint

Tags: calculate your academic footprint, citation tracking, research impact

About | Author Profiles | Find Publications (Steps 1-2) | Track Citations (Steps 3-6) | Count Citations (Steps 7-11) | Your h-index | Help

Find Publications (Steps 1-2) Print Page Search: This Guide Search

Step 1: Create Master List Folders

Create Master List Folders for your publications using bibliographic management software (such as RefWorks)

Begin by setting up a RefWorks account, and create a series of *Master List* folders titled as follows:

Organizing publications in this way is key to the process offered by this guide!

NOTE

Master List - Other can be used for government

Steps 2 & 2.1: Find Your Publications

Identify databases containing your publications and that have citation-indexing functionality

Examples include:

- Web of Science, Scopus, Google Scholar
- IEEE Xplore, SPIE, SciFinder, AnthroSource
- ProQuest: Social Services Abstracts, etc (more ProQuest databases)

Access the above tools via Research Databases by subject.

Step 2.1: Find your publications within a selected database

To locate your publications, you can search one article at a time OR you can capture all your publications in one search.

- For example, you can look for an *author search/author finder* option in the database. Enter your name as the database instructs (e.g. MacDonald M*). Use refinement options to narrow search, complete search and review results.

If you have a very common name OR are not listed, you can proceed with one of these options:

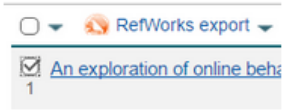
- Search for your last name and each article title, OR

Steps 2.2 & 2.3: Add Your Publications to RefWorks

Step 2.2: Export your publications' bibliographic information to RefWorks

Scopus

1. Select the citations you want to export by clicking the checkbox on the left hand side.



2. Select *RefWorks Export* and follow the prompts to access your RefWorks account.

Web of Science

1. Select the citations you want to export by clicking the checkbox on the left hand side.

Reference Management Tools

1. What is Reference Management Tool?

Reference Management Tools are software tools that can help you organize your references and citation, create reference lists/ bibliographies, collaborate with others online, and discover the latest research in your subject areas.

2. General Features

Maintain huge number of references for your dissertations or research projects

Manage, organize, cite and collaborate

Create and format references in various citation styles instantly

Import citations from databases, library catalogues, websites and more

Work on your references anytime, anywhere

Source: https://www.lib.polyu.edu.hk/research-support/tools/ref-management-tools

©2016-2017 Nader Ale Ebrahim

Why use a reference management tool

- Reference management tools saves time for researchers and help them work more efficiently;
- Reference management tools help scholars to create and manage their lists of references for research projects;
- Reference management tools should be tightly integrated into user's overall research workflows;
- Reference management tools are designed to organize citations into specific formats for the preparation of manuscripts and bibliographies.
- Reference management tools is needed to facilitate sharing and collaboration.

©2016-2017 Nader Ale Ebrahim

All Citation Management products have these basic features:

- Gather and transfer references from databases/resources/webpages into your personal research database
- Organize, annotate, sort and search your references, images and PDFs
- Insert in-text citations and reference lists into documents in a wide variety of styles (MLA, APA, etc)
- Create stand alone bibliographies in a wide variety of styles

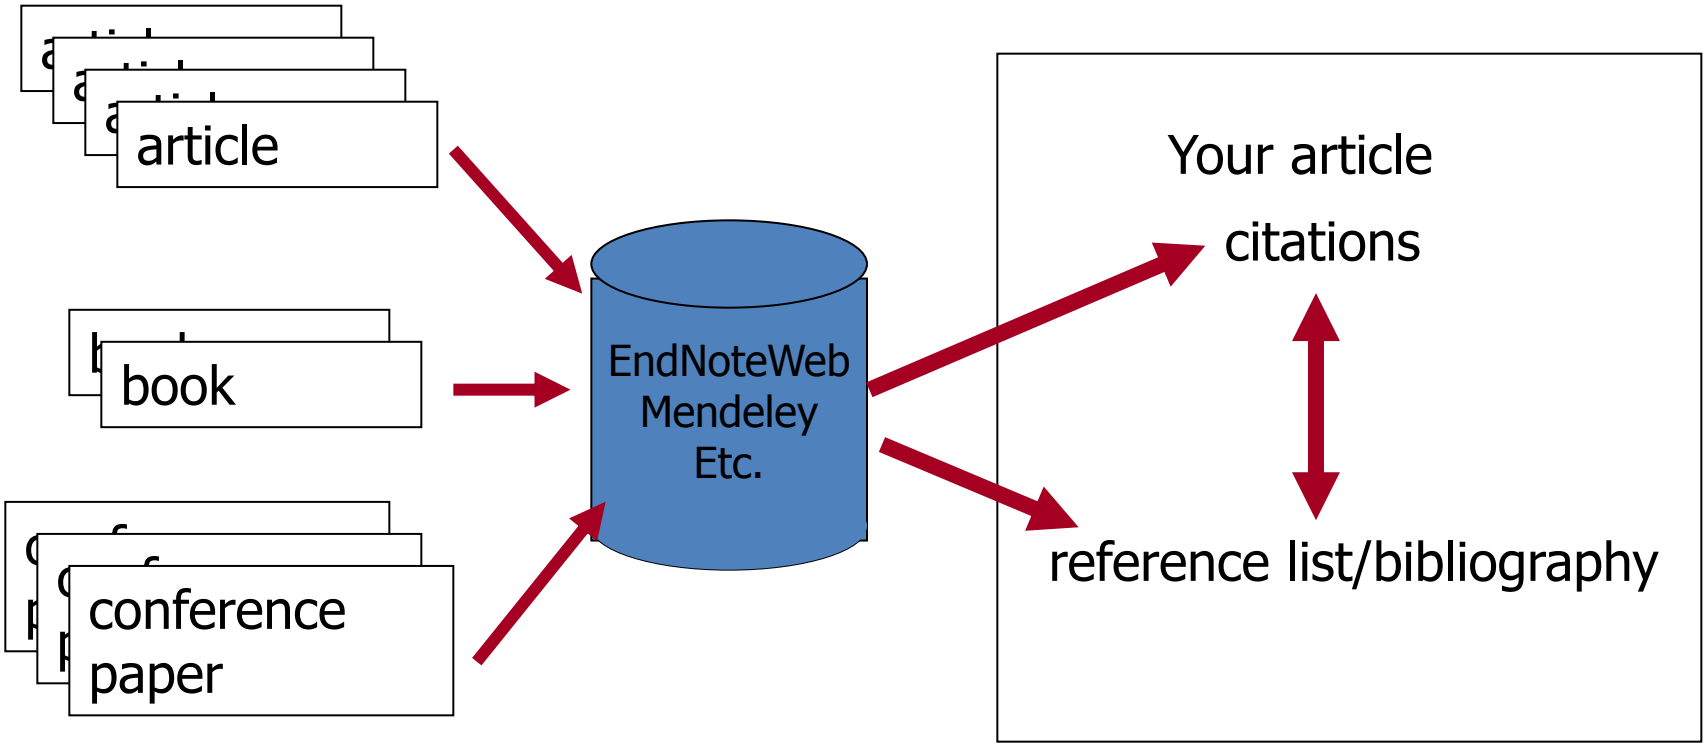
Use a reference management tool!



Source: Managing References: Mendeley By: HINARI Access to Research in Health

©2016-2017 Nader Ale Ebrahim

Mendeley

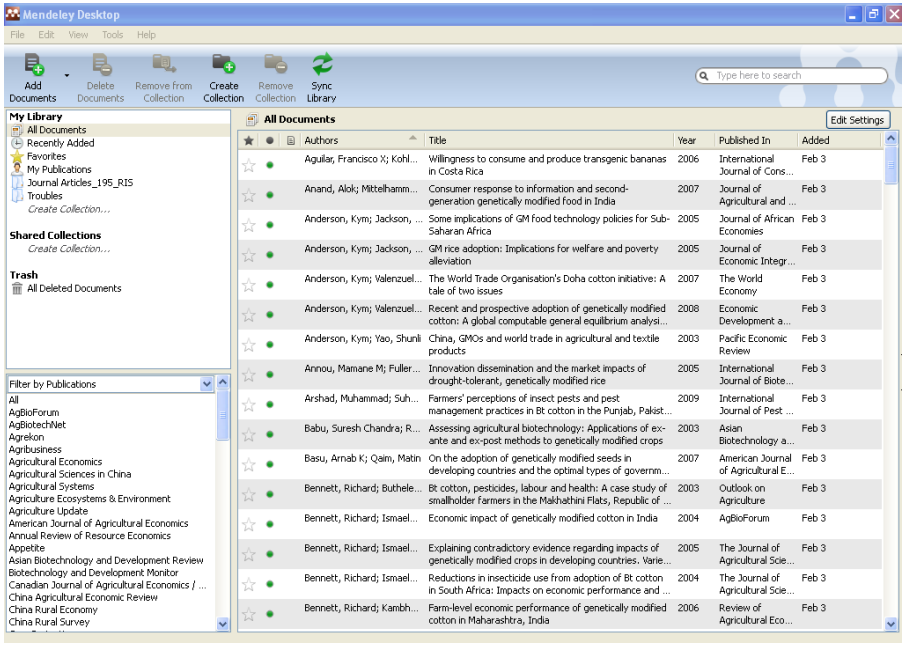
Mendeley is a free reference manager and academic social network that can help you organize your research, collaborate with others online, and discover the latest research.

©2016-2017 Nader Ale Ebrahim

Syncs Desktop & Web applications

- **Desktop – a free academic software to manage, share, read, annotate and cite your research papers**

- **Web - a research network to manage your papers online, discover research trends and statistics, and to connect to like-minded researchers**



©2016-2017 Nader Ale Ebrahim

EndNote

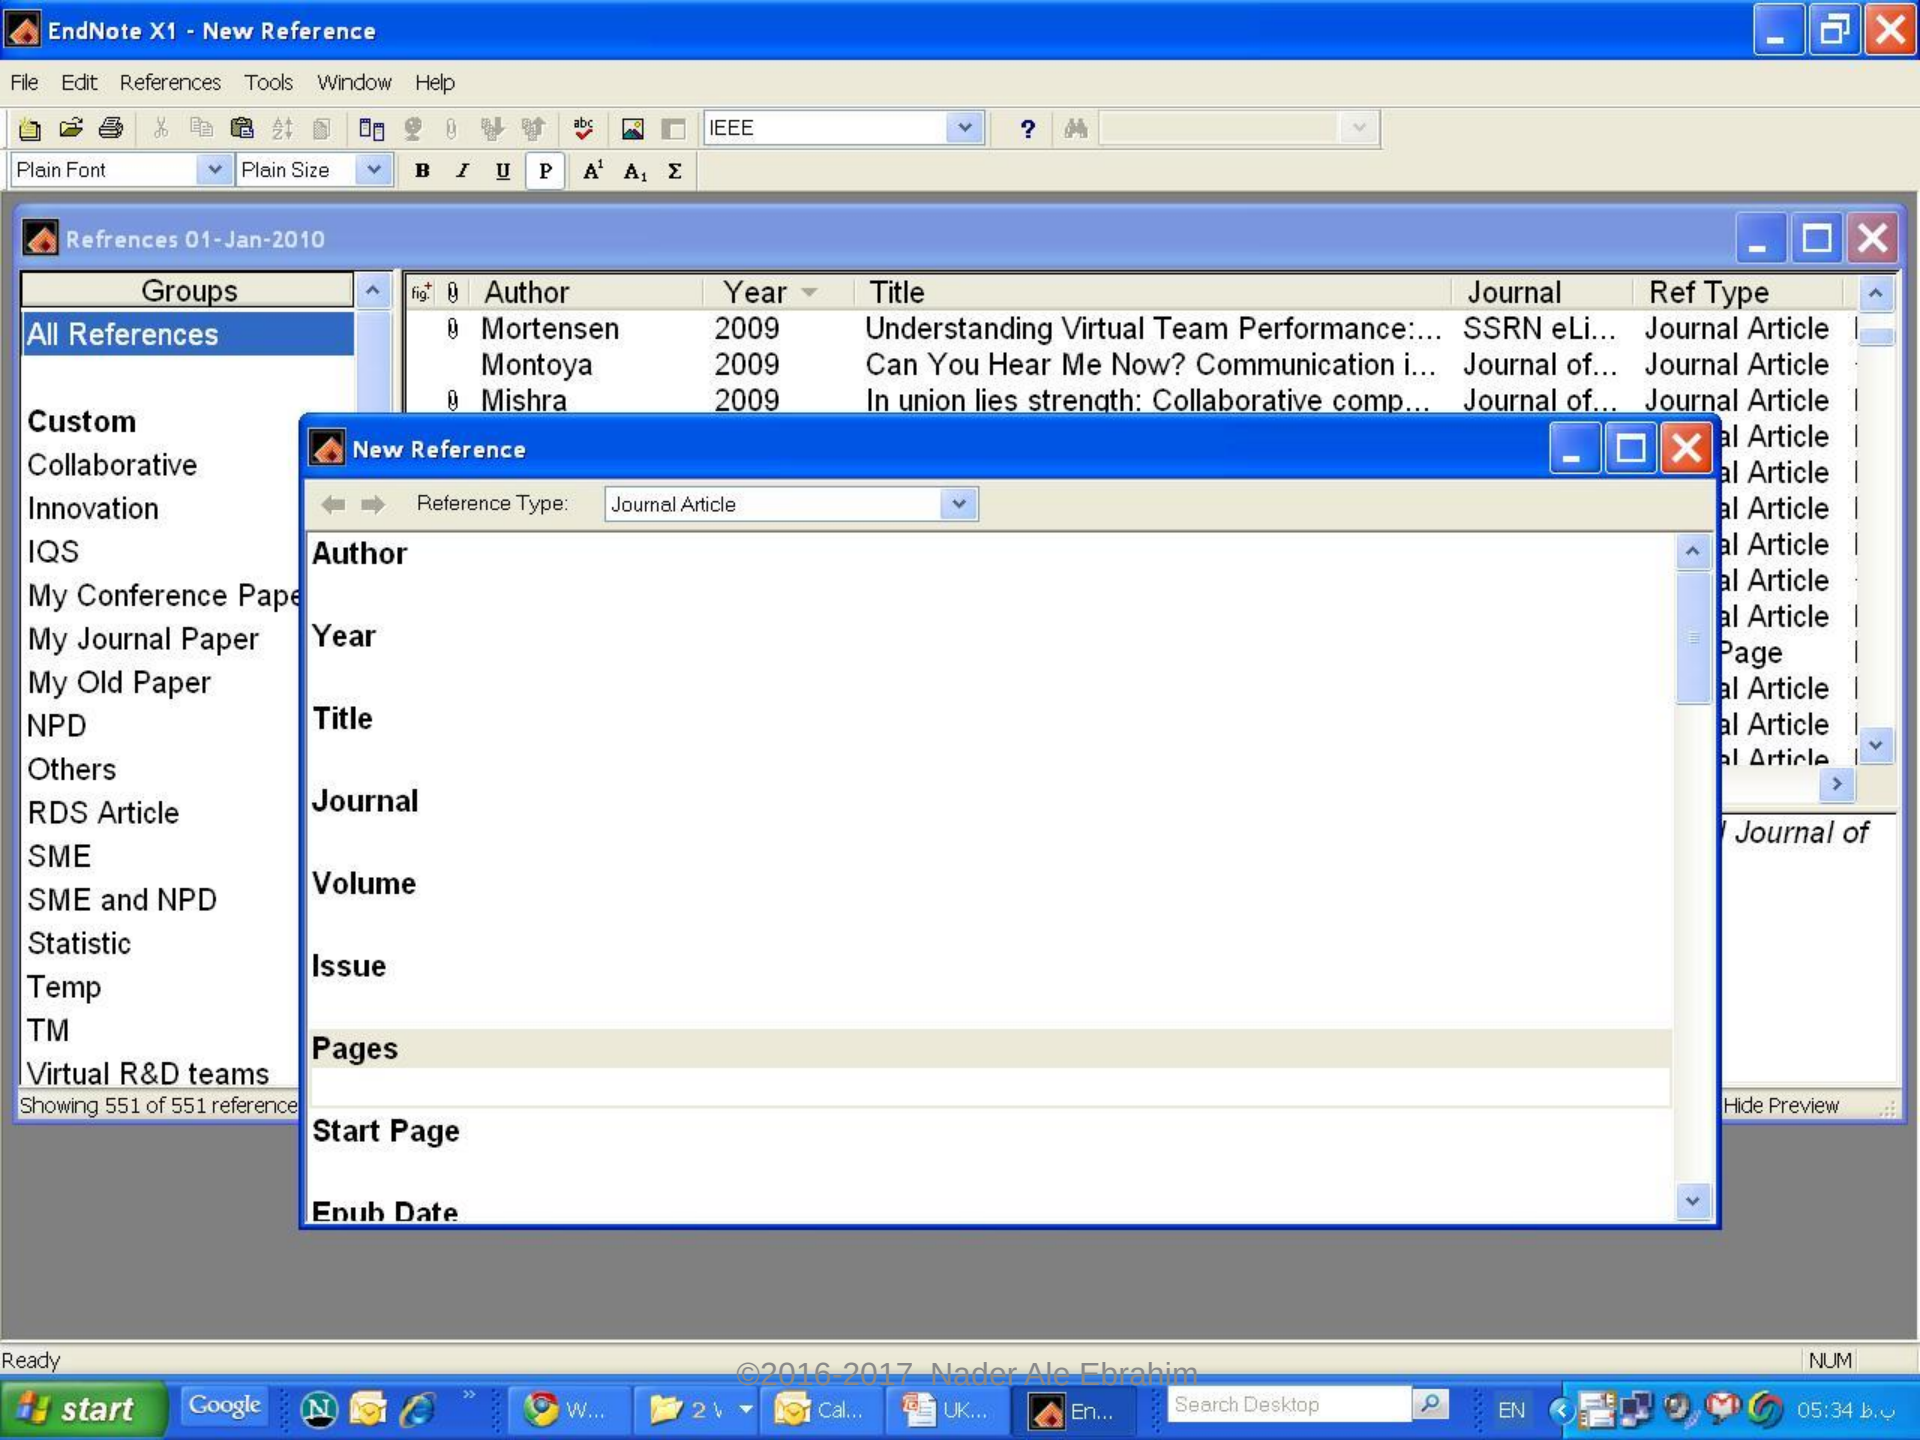
- *EndNote* is an almost indispensable tool for the serious researcher, and best of all, it's free to all UM postgraduates!

©2016-2017 Nader Ale Ebrahim

Why use *EndNote*?

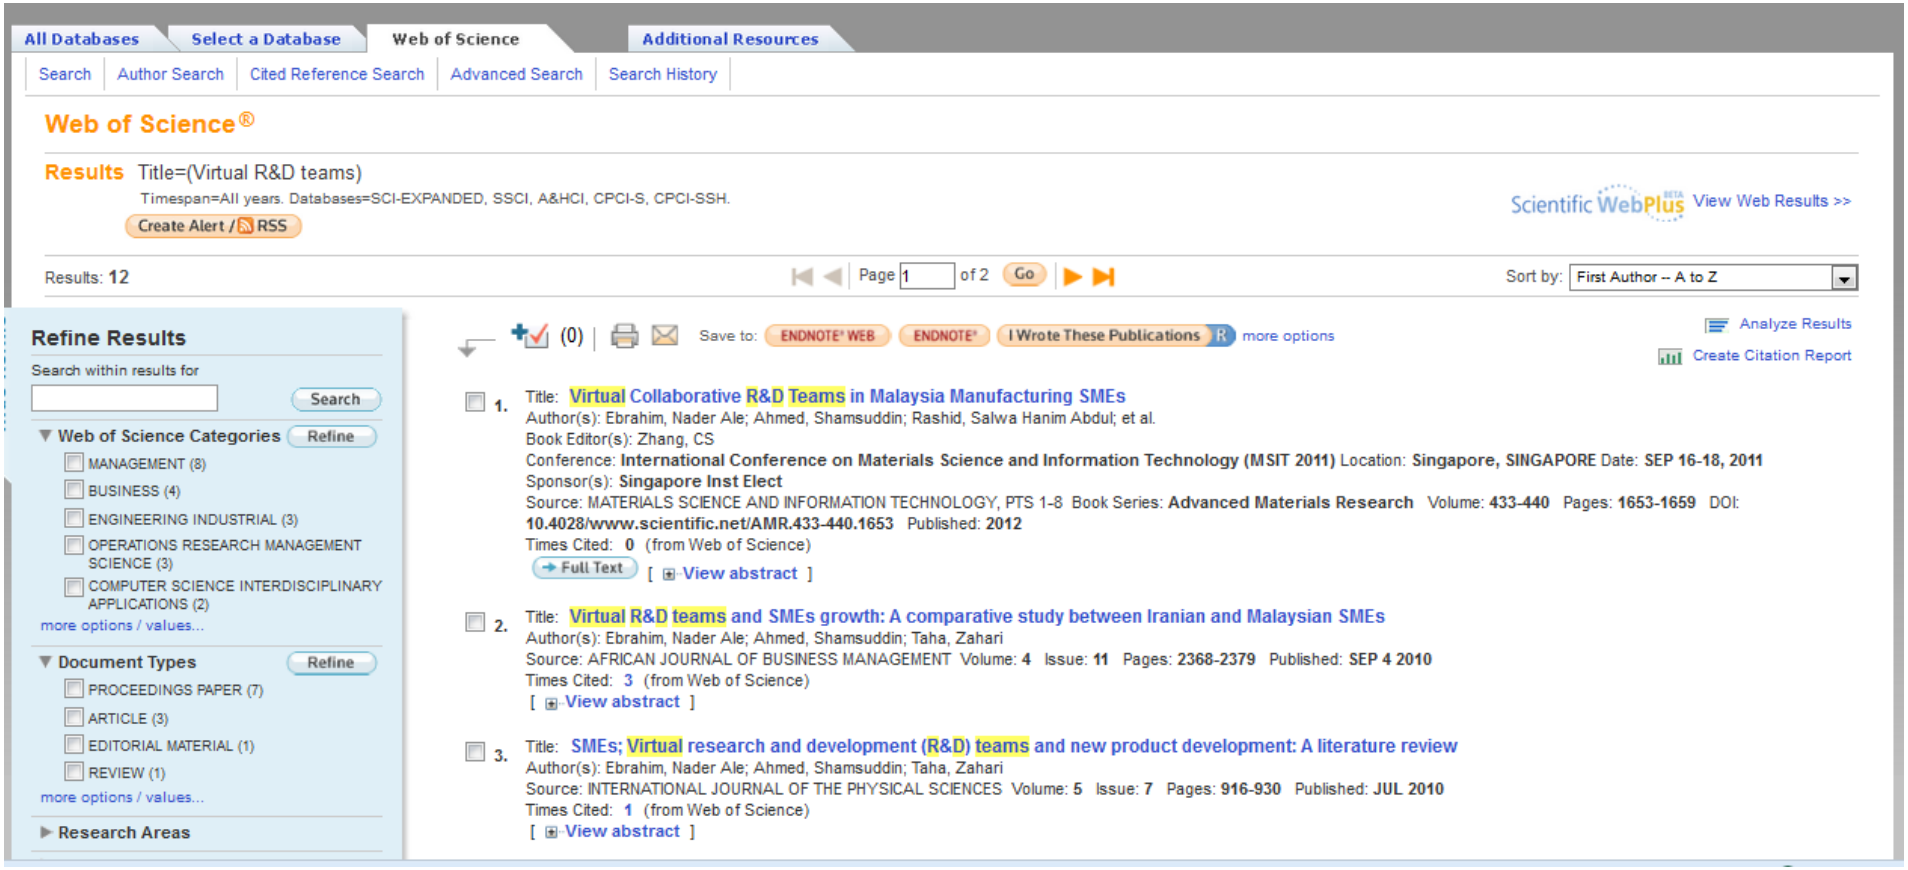
- *EndNote* allows you to create your own reference library. This library can be used to store the bibliographical details relating to the articles and books that you use. When it comes time to write your thesis, you can employ the library to insert references into your text and produce your bibliography. *EndNote* will save you hundreds of hours over the course of your research.

©2016-2017 Nader Ale Ebrahim

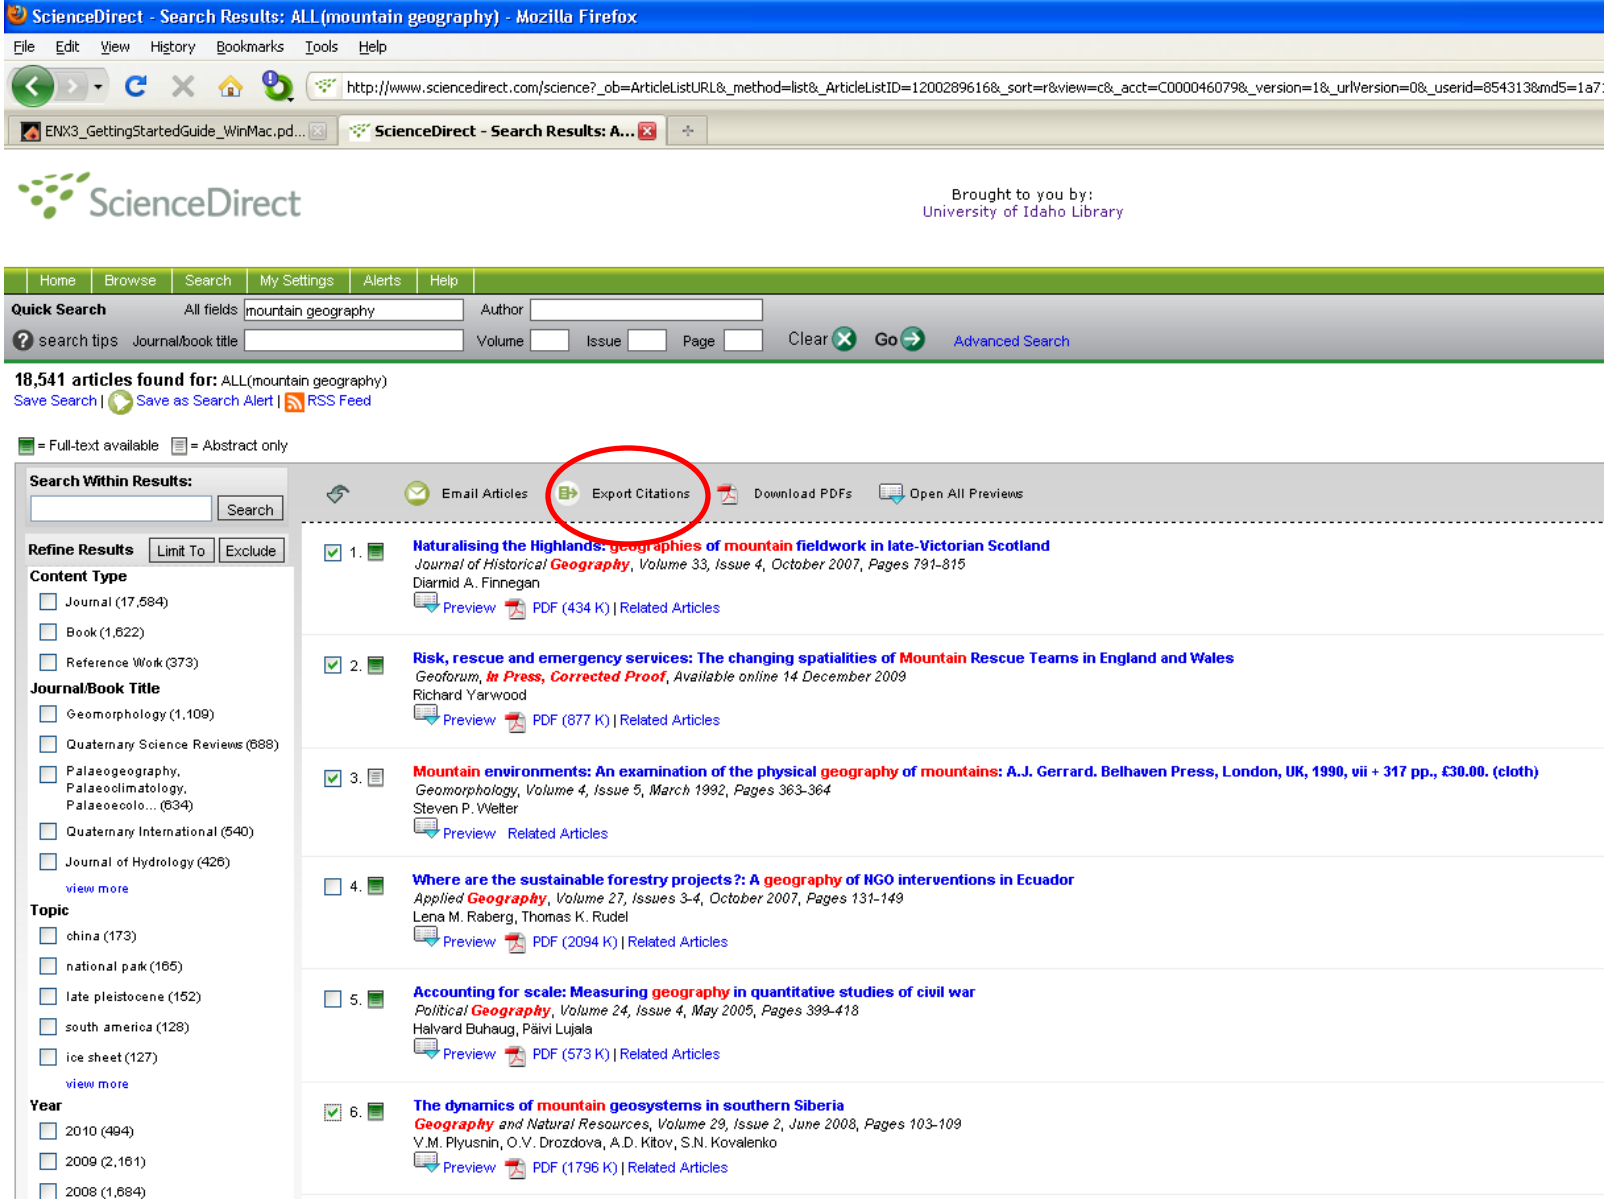


©2016-2017 Nader Ale Ebrahim

Export to EndNote

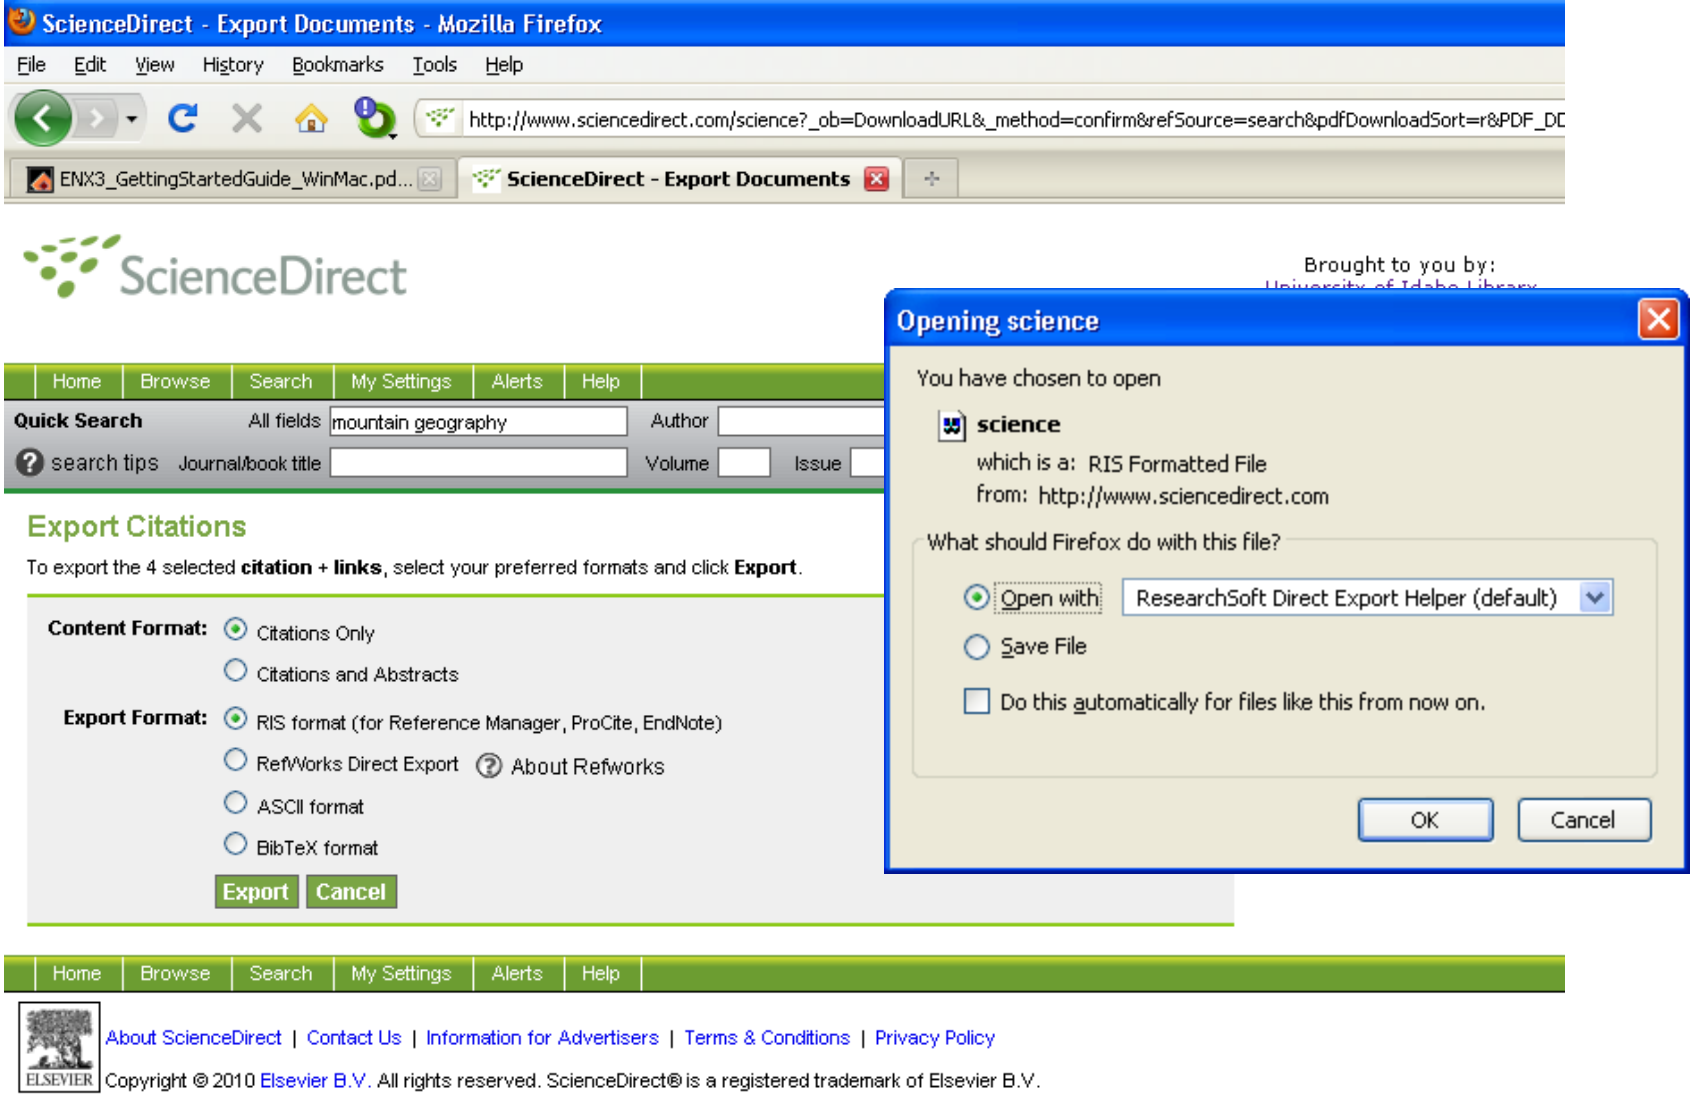


©2016-2017 Nader Ale Ebrahim



ScienceDirect (Elsevier) allows you to check your desired citations, then click on the “Export Citations” link…

©2016-2017 Nader Ale Ebrahim



… then you select which pieces of information you really want in your EndNote database, using the radio buttons, then click on the “Export” button to bring up the dialog box we have seen before to transfer the temporary file into EndNote

©2016-2017 Nader Ale Ebrahim

Import and export from EndNote
