Abstract

Abstract: You need tools to disseminate the research findings and publications and make sure that the high quality work of your research, reaches to the widest possible audience outside of your academic research discipline. Kudos is one of the service that provides tools for researchers to maximize the visibility and reach of their published papers. **Kudos** provides a new way for authors to use social media to engage the digital community with their research. By creating 'profiles' for their published articles and adding short titles, lay summaries, impact statements and supplementary content, authors can make their articles more engaging for a digital readership.

Keywords: H-index, Improve citations, Research tools, Bibliometrics, KUDOS, Research impact, Research Visibility

WORKSHOP SERIES TOPICS

SESSION	DATE	TIME	TOPIC
1	7 September 2016	2.00 – 4.30 p.m.	Citations and its impact to university ranking
2.1	22 September 2016	10.00 a.m. – 12.00	Research Outreach: Wider Visibility to Increase Citation*
2.2		2.00 – 5.00 p.m.	Plain Language Summary: The Common Language of Research & Innovation *
3	28 September 2016	2.00 – 4.30 p.m.	Analysis of bibliometrics information for select the best field of study
4	5 October 2016	2.00 – 4.30 p.m.	A new system for measuring research impact
5	12 October 2016	2.00 – 4.30 p.m.	How to select a brand name for your research interest?
6	19 October 2016	2.00 – 4.30 p.m.	Optimize articles for search engine to improve research visibility
7	26 October 2016	2.00 – 4.30 p.m.	Prepare a pre/post print of your documents for advertisement
8	2 November 2016	2.00 – 4.30 p.m.	Create a publication database for enhancing research visibility
9	9 November 2016	2.00 – 4.30 p.m.	Create a google scholar profile to boost research visibility
10	16 November 2016	2.00 – 4.30 p.m.	Create and maintain an up-to-date researcherid profile
11	23 November 2016	2.00 – 4.30 p.m.	Online repository: improving the research visibility and impact
12	30 November 2016	2.00 – 4.30 p.m.	Kudos: promote your published research reach and impact
13	7 December 2016	2.00 – 4.30 p.m.	Journal selection procedure: select the best journal to ensure the highest citation
14	14 December 2016	2.00 – 4.30 p.m.	Establish your expertise with a science blog
15	21 December 2016	9.00 – 11.30 a.m.	Promote your research work on LinkedIn
16	4 January 2017	9.00 – 11.30 a.m.	Make your data discoverable on a data repository
17	11 January 2017	9.00 – 11.30 a.m.	Microblogging for enhancing the research accessibility
18	18 January 2017	9.00 – 11.30 a.m.	Make an audio slides for your research
19	25 January 2017	2.00 – 4.30 p.m.	Academic social networking (ResearchGate & Academia) and the research impact
22	1 March 2017	2.00 – 4.30 p.m.	Document publishing tools" for research visibility improvement
23	8 March 2017	2.00 – 4.30 p.m.	Publication's e-mail marketing procedure
24	15 March 2017	2.00 – 4.30 p.m.	The use of reference management tools to improve citation
25	22 March 2017	2.00 – 4.30 p.m.	Contribute to Wikipedia: an approach to increase research visibility on the web

Helsinki University Library partners with Kudos to strengthen research support services

Charlie Rapple / 42 mins ago

For immediate release, November 25th, 2016 –– Kudos (www.growkudos.com), the award-winning service for maximizing the reach and impact of research publications, has announced that Helsinki University is the latest university to sign up for Kudos for Institutions. The University, a member of the League of European Research Universities, will use Kudos to strengthen its research support services and help to maintain its high profile and rankings.

Kudos

ku·dos

/ˈk(y)ōōˌdäs,ˈk(y)ōōˌdōs/

noun

praise and honor received for an achievement.
synonyms: praise, glory, honor, status, standing, distinction, fame, celebrity; More

- NORTH AMERICAN *informal*

compliments or congratulations.
plural noun: kudos
"kudos to everyone who put the event together"

Translations, word origin, and more definitions

Strategies for Enhancing the Impact of Research

Improving access and retrieval of your research study is the surest way to enhance its impact. Repetition, consistency, and an awareness of the intended audience form the basis of most the following strategies.

[Preparing for Publication](#)

[Dissemination](#)

[Keeping Track of Your Research](#)

Authors cite a work because:

–It is relevant (in some way) to what they're writing

–They know it exists

Source: Gosling, C. (2013). Tips for improving citations 2nd Bibliometrics in Libraries Meeting: The Open University.

lar@ VPS @iaravps · Mar 12
@skonkiel You can even cite what you didn't read, but you can't cite what you don't know exists :)

Research Hive Seminars 2014

Now in its fifth year, the highly popular Sussex Research Hive Seminar series returned to bring together the research community to discuss a range of current issues. This year speakers explored how archives can support qualitative research and approaches for increasing the reach of your research, as well as how to demonstrate the impact of creative research outputs, and innovations in scholarly publishing.

These lunchtime events, funded by SAGE, were hosted by the Library and open to everyone engaged in, or supporting, the research process at Sussex.

Increasing the reach of your research

With academics increasingly facing information overload, how can you ensure that other researchers find your articles in the first place? This seminar looked at different approaches: Kudos, a new service which can help you increase the impact of your research, and case studies from academics who have used social media to generate interest in their work.

Speakers:

James Wilsdon - Professor of Science and Democracy, University of Sussex **(Audio /Slides)**

Tim Hitchcock - Professor of Digital History, University of Sussex **(Audio / Slides)**

KUDOS

The MIT Press Partners with Kudos

In November 2015, the MIT Press became a publishing partner with Kudos, a service to "help researchers explain, enrich, and share their publications for greater research impact." With just a few clicks, authors can claim their publications and promote them to the wider public.

Why partner with Kudos?

With millions of academic articles published each year, it's a challenge for authors to draw attention to their individual works. Kudos surmounts this obstacle by providing opportunities to further disseminate the high quality, high impact articles we publish at the MIT Press. We're optimistic about increasing the readership and the reach of our journals program.

I'm an author and I'd like to share my articles. How can I get involved with Kudos?

Almost 18 months ago, I wrote a post for this blog about Kudos, then a pilot service to help researchers and their publishers increase the reach and impact of publications. The pilot was a success, with basic analysis indicating that downloads of full text were 19% higher for publications explained and shared using the Kudos toolkit. The service launched fully in April 2014, and to date has attracted over 35,000 researchers and 35 publisher partners – including Wiley, whose own experimentation with Kudos in 2014 resulted in encouraging indications of the effect that Kudos can have on reach and impact.

A number of developments have helped to improve the service since launch, for example, our integration with ORCID®, which makes registration and claiming easier for authors that already have ORCIDs. We're also now piloting an institutional service, which will give staff in roles such as

Emerald extends partnership with Kudos after authors benefit from record pilot

Bingley - United Kingdom, 10 July 2015 – After a successful trial period in 2014, Emerald Group Publishing, global publisher linking research and practice, has extended its partnership with Kudos - an online platform that helps increase the impact of published articles - to roll out the value-add service for Emerald authors. Results of the 2014 trial were very encouraging with Emerald authors showing the highest level of activity across the Kudos trial, illustrating the interest of Emerald authors in broadening the reach and impact of their research.

Academics are increasingly under pressure to illustrate the value of their work to wider society and to extend their impact and visibility; the Kudos platform provides a valuable set of resources towards achieving this goal. One indication of the value of the pilot to Emerald authors was that usage of full-text articles for those authors trebled when using the Kudos tools, compared to articles whose authors did not use the service.
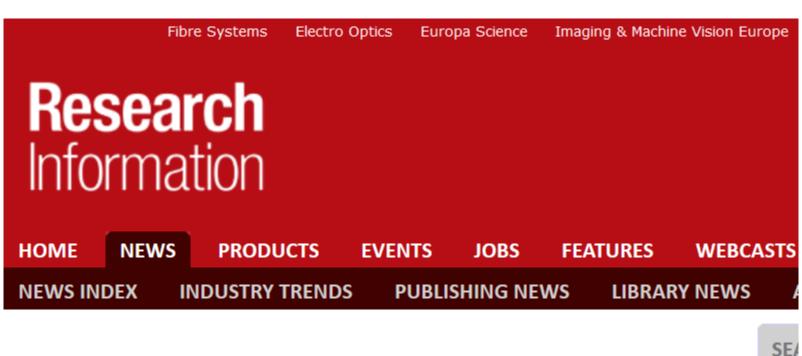

Tony Roche, Emerald's Publishing Director, comments: "Partnering with Kudos offers Emerald authors further support in extending the impact of their research. Social media is now firmly embedded as a scholarly communication tool. The Kudos service provides authors with an opportunity to share insights globally and reach wider audiences, across subject communities and a variety of stakeholders. Aligning closely with Emerald's vision to better link research and practice, our continued collaboration with Kudos affirms the company's commitment to supporting authors in achieving their goals.

What is Kudos? An Interview with David Sommer, Co-Founder

- The idea for Kudos was born at the ALPSP (Association of Learned and Professional Society Publishers) conference in 2012 when Melinda Kenneway and Charlie Rapple (both from TBI Communications) and David Sommer, Co-Founder sat down and started talking about the challenges that face academic researchers today.

- **Kudos pilot phase was until Dec 2013.**

- Kudos is available for authors of published research from any field

- Kudos is well positioned to support the scholarly publishing process and help authors become more efficient and effective at communicating their works to maximize the reach and impact of their research.
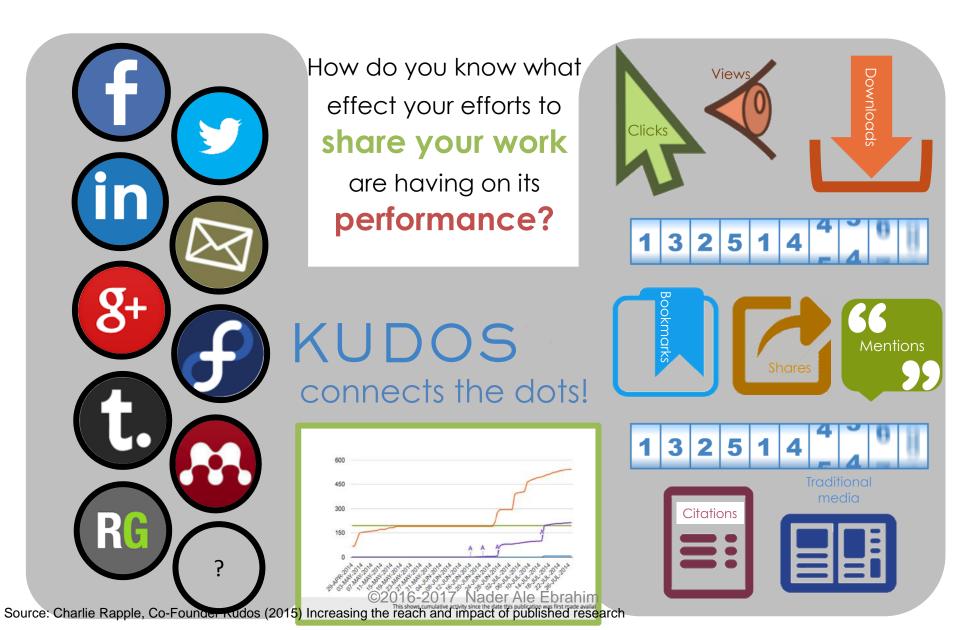

Launched May 2014

30,000+ researcher registrations

1,000+ new registrations weekly

300,000+ publications claimed

Free for authors to use

Source: Charlie Rapple, Co-Founder Kudos (2015) Increasing the reach and impact of published research

The Kudos workflow

Kudos provides an independent, cross-publisher platform for researchers to explain and share their work with wider audiences, and to measure the impact this has on downloads, citations and altmetrics.

There are four simple stages involved for authors to achieve this:

Explain – Explain publications by adding plain language short titles and lay summaries, and by highlighting what makes the work important; this serves to boost discoverability

Enrich – Enrich articles by adding links to related resources (including videos, slides, data, etc.) that will help put author research in context

Share – Share publications by email and social media. Kudos will also share content and links with other discovery channels to maximise reach

Measure – Measure the impact on article performance against an array of metrics, including downloads, citations and altmetrics, providing a comprehensive picture of a specific article's success

Source: Melinda Kenneway, Kudos (2015) Whose work is it anyway? Helping researchers maximize reach and impact of their work

Step 1: Explain your publications

- Adding a **short title** to your publications will help make them easier to find and can help increase citations. Make the title specific, descriptive, concise, and comprehensible to a broad range of readers. Studies show that the **construction of an article title has a significant impact on how frequently the paper is cited** [1]. Studies also show **articles with short titles can be more highly cited** [2].

- Adding a simple, non-technical explanation (**lay summary**) of your publication will make it easier to find, and more accessible to a broader audience. Adding an explanation of what is most unique and/or timely about your work (**impact statement**), and the difference it might make, will also help increase readership.

- **Kudos will deposit this additional information about your article with a range of discovery services**, all linking back to your publication, to ensure it is even easier to find, read and cite.

- Useful resources to help you write lay summaries and impact statements:
    - http://www.dcc.ac.uk/resources/how-guides/write-lay-summary
    - http://www2.ncri.org.uk/ctrad/documents/ctrad_how_to_write_a_good_lay_summary_nov_2012.pdf
    - http://blogs.bournemouth.ac.uk/research/2011/06/15/writing-a-lay-summary-is-easy-right/
    - http://www.southampton.ac.uk/ris/funding/impact.html
    - http://www.sfi.ie/funding/sfi-research-impact/impact-statements/what-makes-a-good-impact-statement.html
    - http://agsci.oregonstate.edu/research/writingimpacts

Source: https://www.growkudos.com/about/improve-my-results

EXPLAIN

Step 1

Authors write a short title, lay summary and impact statement.

CAPTURE WHAT IS MOST SIGNIFICANT

SUMMARIZE THE MAIN OUTCOME

What is plain language?

*"A communication is in plain language if its wording, structure, and design are so clear that the intended readers can readily **find** what they need, **understand** it, and **use** it."* Check your writing against the [plain language checklist](#).

Check your writing against the [plain language checklist](#)

- **Does document meet the readers' needs?**
- **Is the message clear?**
- **Are the paragraphs effective?**
- **Are the sentences effective?**
- **Are the words effective?**
- **Have I used headings effectively?**
- **Did I use list and tables?**
- **Have I checked the spelling and grammar?**
- **Does it <u>look</u> easy to read?**

Step 2: Enrich your publications

- Link your publications to related resources such as images, videos, blogs, data sets etc. These additional resources also help give readers a broader view of your work and can help increase citations.

- **Studies that made data available** in a public repository **received 9% more citations** than similar studies for which the data was not made available. **Publicly available data** was significantly (p=0.006) associated with a **69% increase in citations**, independently of journal impact factor, date of publication, and author country of origin using linear regression [3]. Evidence also exists from individual publishers that linking videos to articles can increase downloads.

Source: https://www.growkudos.com/about/improve-my-results

ENRICH

Step 2

Authors link related materials to their article, book or book chapter.

Step 3: Share your publications

- Sharing your publications by email and social media can significantly increase usage and citations. For example, one study showed that **highly tweeted** articles are **11 times** more likely to be **highly cited** than less tweeted articles [4].

- Significant evidence also exists that promoting individual articles generally positively impacts on publication performance. One study showed that the **difference in citation count** for promoted articles versus non-promoted articles can still be **observed for more than 3 years post publication** [5].

Source: https://www.growkudos.com/about/improve-my-results

SHARE

Step 3

Authors share links to their publications by email and through social media.

KUDOS

MEASURE

Authors can track the impact of this against a wide range of metrics.

# import the citations from ORCID into your Kudos

- First sign in to Kudos and select "Manage Account" from the My Tools drop down menu. Then, simply click the "create or connect your ORCID iD" button. Once your ORCID iD is connected to your Kudos account, Kudos can retrieve the list of publications you have added to your ORCID record and those you add in the future. These publications will appear on your "My Profile" page on Kudos.

- If you haven't associated any publications with your ORCID record yet please create your ORCID publication list. See "How do I create my ORCID publication list?" for further information.
