Abstract

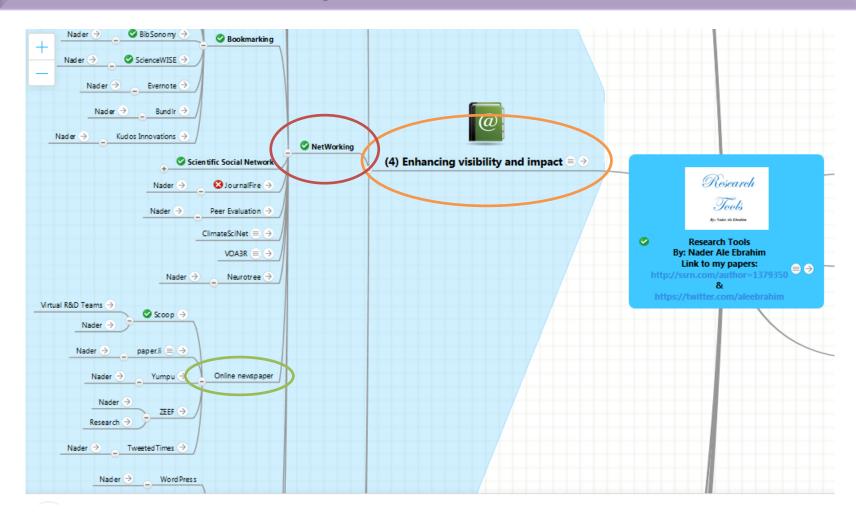

Abstract: The long run research findings will be disseminated through publications. However, researchers may have created some local content which should be circulated immediately. Online magazines can be one solution through content curation to immediately circulate the research findings. Content curation is not just sharing all kinds of content you stumble upon or source. It's most of all about doing it in a smart and audiencecentric way, by focusing on specific topics you want to curate content about. This workshop introduce various tools on Publish online magazine (Content curation) to increase the visibility and enhance the impact of research work.

Keywords: H-index, Improve citations, Research tools, Bibliometrics, Content curation, Research visibility

Research Tools Mind Map

4-Enhancing visibility and impact -> NetWorking -> Online newspaper

From submission to sharing: the life cycle of an article

- Phase 1: Conception and birth
- Phase 2: Submission
- Phase 3: Reviewers

- Phase 4: Production and publication
- Phase 5: Dissemination and archiving
 - The article is published, but its life cycle isn't yet complete. In this phase, dissemination can start; sharing the <u>Share Links</u> article helps increase readership and make it more visible.

Sharing Your Findings with a General Audience

SUMMARY

- · Effectively sharing your research with a general audience can positively affect funding for your work
- . Engaging the general public can further the impact of your research

Benefits of connecting with an audience

Ties between the general public and scientists, however, extend beyond their similarities as knowledge seekers desiring guided access to the overwhelming mass of new knowledge. Researchers' objectives of funding and impact, illustrated above, overlap with two potential outcomes of lay exposure to scientific findings: further funding and further impact.

What is content curation?

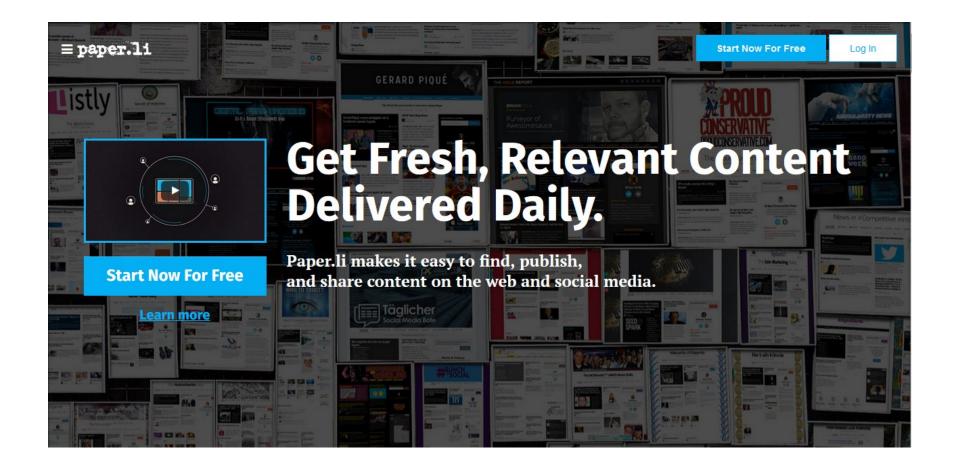

"Content curation is the process of sorting through the vast amounts of content on the web and presenting it in a meaningful and organized way around a specific theme".
