# Abstract

**Abstract:** Congratulation, you published a paper. Has anyone read it? or Cited it? Citation tracking is used to discover how many times a particular article has been cited by other articles. Citation counts are not perfect. They are influenced by a number of factors. Review articles are sometimes more often cited than their quality would warrant. Poor quality papers can be cited while being criticized or refuted. In this workshop, I will explain about the advantages of "Citation Tracking" and introduced some "[Research Tools](#)" for improving the research impact and citations by "**Tracking Citations**".

**Keywords:** H-index, Improve citations, Research tools, Bibliometrics, Research Visibility, Citation Tracking

# UNIVERSITY LIBRARIES

UNIVERSITY AT ALBANY - STATE UNIVERSITY OF NEW YORK

## Effective Strategies for Increasing Citation Frequency

**Journal Reputation and Impact:** publishing a paper in a journal based on disciplinary reputation or with a high impact factor is the most well known way of getting your paper cited. But there are many other things a scholar can do to promote his or her work and make it easy for others to find.

**Utilize Open Access Tools:** Open Access journals tend to be cited more than non open access. Deposit your paper in a repository such as Scholars Archive here on campus or a disciplinary repository. Share your detailed research data in a repository.

**Standardize Identifying Info:** try to use the same name throughout your career as well as the name of your affiliated institution. Using common "official" names will allow for consistency and easy retrieval of your work by author or affiliation.

**Bring Colleagues on Board:** team-authored articles are cited more frequently, as does publishing with international authors. Working cross-or inter-disciplinarily helps as well.

**Beef Up That Paper:** use more references, publish a longer paper. Also papers which are published elsewhere after having been rejected are cited more frequently.

**Beyond Peer-Reviewed Original Research:** Write a review paper. Present a working paper. Write and disseminate web-based tutorials on your topic.

**Search Optimization:** use keywords in the abstract and assign them to the manuscript. Use descriptive titles that utilize the obvious terms searchers would use to look for your topic, avoiding questions in the title. Select a journal that is indexed in the key library databases for your field.

**Market Yourself:** create a key phrase that describes your research career and use it. Update your professional web page and publication lists frequently. Link to your latest and greatest article in your professional email signature file.

**Utilize Social Media:** Use author profiles such as ResearcherID and ORCID. Contribute to Wikipedia, start a blog and/or podcast, join academic social media sites.

From: [Ebrahim, N.A., et al. \(2013\). Effective strategies for increasing citation frequency. International Education Studies, 6\(11\), 93-99. doi:10.5539/ies.v6n11p93](#)

# Top 10 authors with the highest profile view counts on ResearchGate

Table 11. Top 10 authors with the highest profile view counts on ResearchGate (9<sup>th</sup> of November, 2015), compared to the same indicator on the 10<sup>th</sup> of September, 2015.

AUTHOR NAME	SEPTEMBER 10 <sup>th</sup>	NOVEMBER 9 <sup>th</sup>	MISMATCH (%)
	(2015) PROFILE VIEWS	(2015) PROFILE VIEW	
Nader Ale Ebrahim	19,821	13,281	67.00

The counting house, measuring those who count: Presence of Bibliometrics, Scientometrics, Informetrics, Webometrics and Altmetrics in Google Scholar Citations, ResearcherID, ResearchGate, Mendeley, & Twitter. *EC3 Reseach Group: Evaluación de la Ciencia y de la Comunicación Científica Universidad de Granada and Universidad Politécnica de Valencia (Spain), In Progress*. doi:10.13140/RG.2.1.4814.4402

# Research Tools Mind Map

# How can I attract attention to my work?

**Write a lay summary of your research** and introduce it via relevant discussion lists and online forums.

**Reach out to key bloggers** to make them aware of your work – look at the Altmetric details pages for other articles in your discipline to see who might be interested.

**Share links to your work** via twitter and other social media after presenting at conferences.

**Upload and make available data, images, posters and other files** via a platform such as figshare.

**Include a link to your work** in your email signature, online profiles or CV.

**Register for an ORCID iD** and populate your profile so that others can easily discover your work.

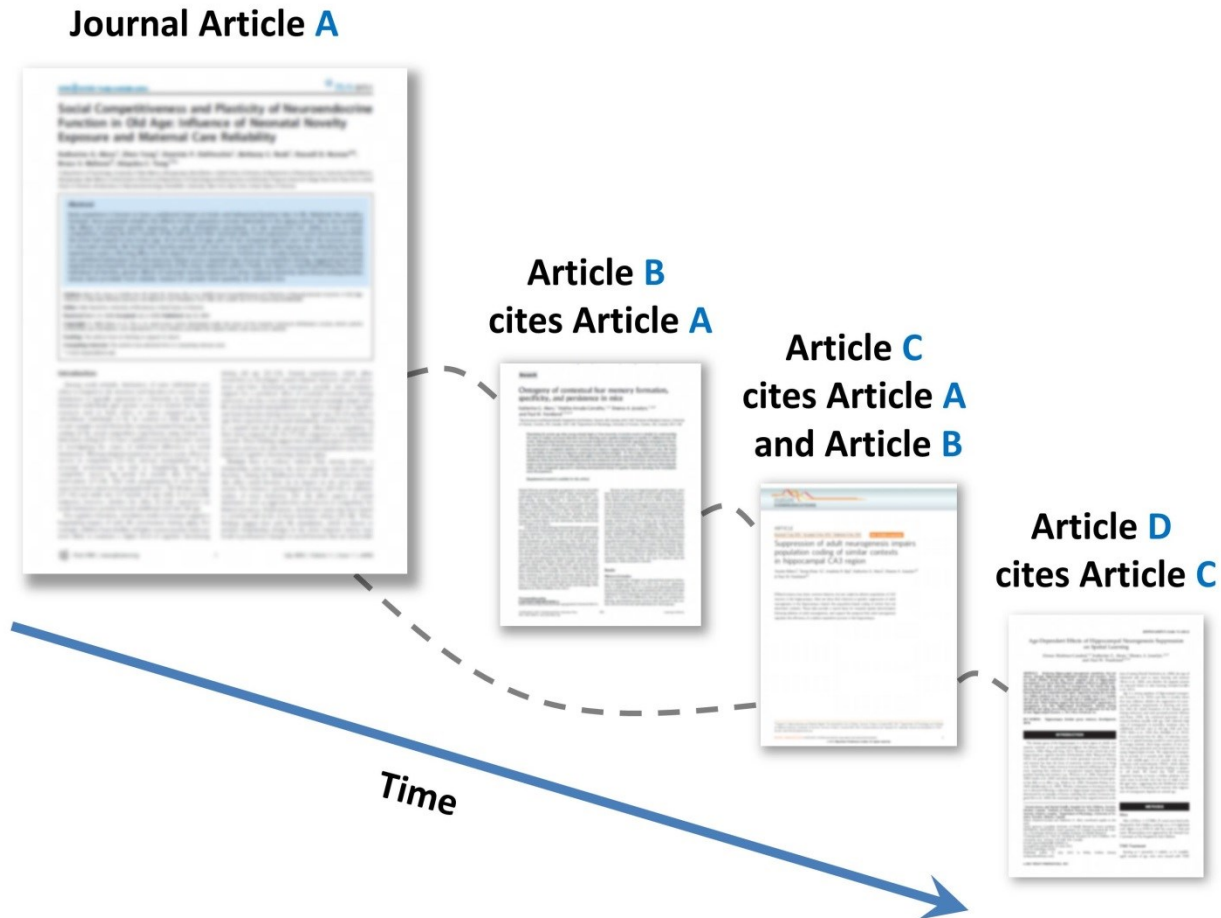

**Start your own blog (or contribute to an existing one)** – it's a great way to build your online profile and position your research.

**Work with the press office** at your publisher or institution to announce the publication of your research.

**Make your work available via Open Access** wherever possible, and share links to your full text outputs on social media.

Search:

This Guide

Search

### Step 3: Create Citation Subfolders

For **each publication** added to RefWorks, create a Citation Subfolder having the same name as the publication

Citation Subfolders will include citing works for your publications, and will be located under the Master List folders.

1. Create one subfolder for every article, book, book chapter, conference proceeding, etc., in your Master Lists folders.

Each subfolder needs to sit under the Master List folder in order to help you tally your citation counts at the end ([step 9](#)).

2. An easy way to create individual subfolders for each publication is to copy/paste the title from

### Step 4: Add Citing Works to RefWorks

Identify the number of times **each publication** has been cited in a particular database

1. Return to the database you used and locate the first of your publications. Look for a citation link (*Times Cited/Cited By/Citations*). For example:

**Times Cited: 15**  
(from *Web of Science Core Collection*)

- a. Note the title of your article, book, book chapter etc.
- b. Click on the citation link associated with that article book etc., to bring up works citing your work.

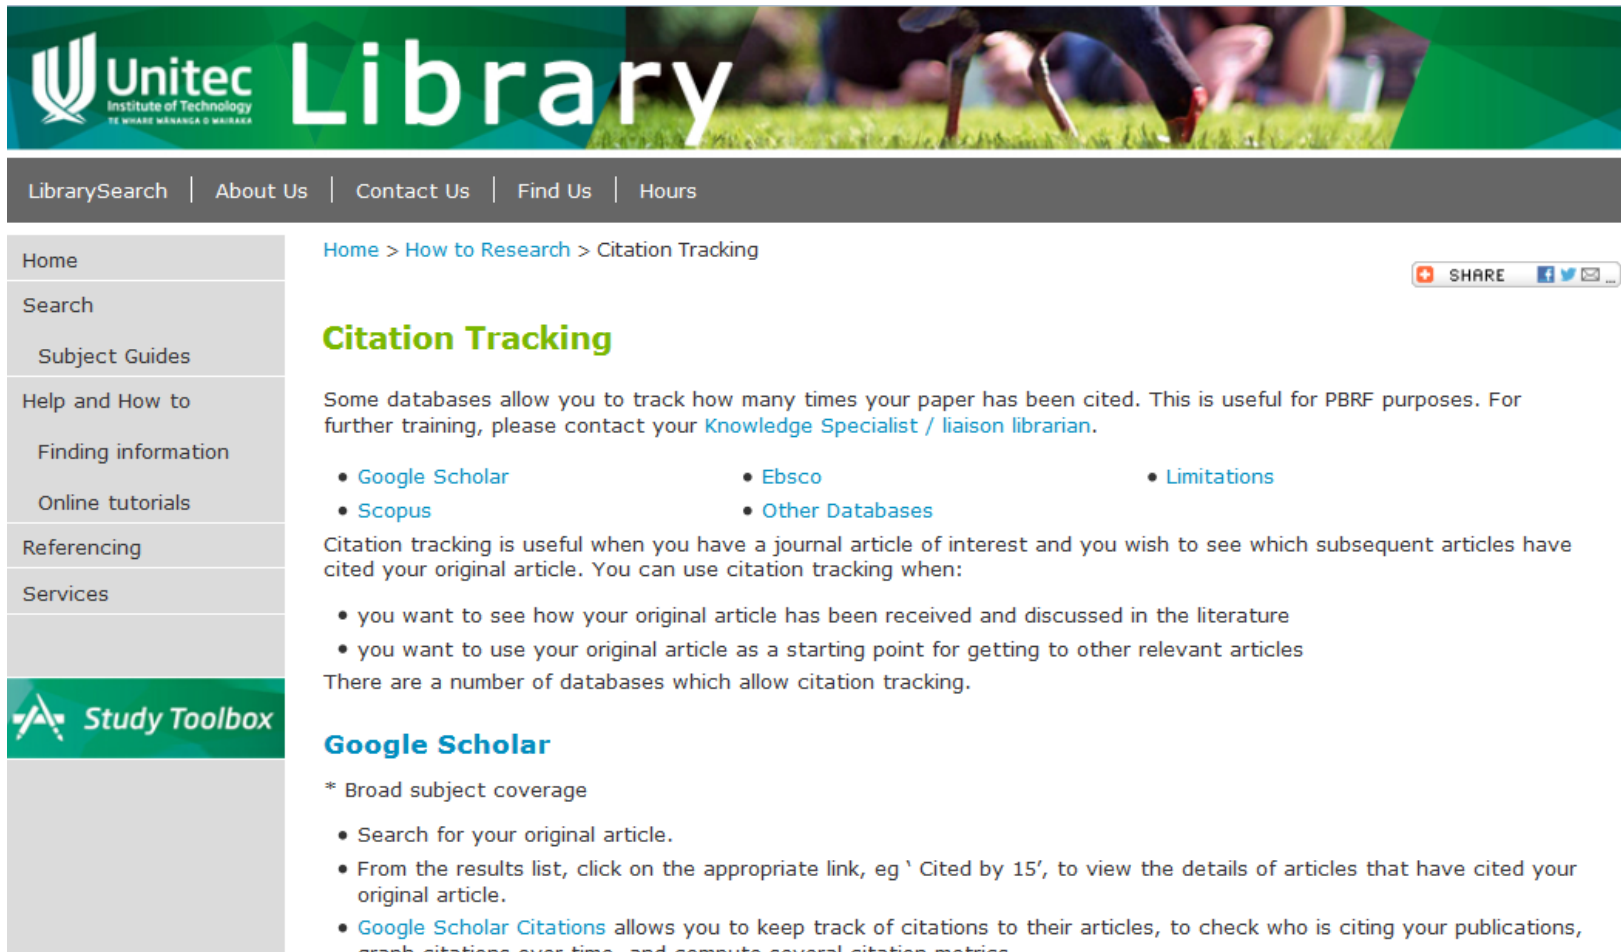

### Step 5: Create Citation Alerts

For **each publication**, set up a Citation Alert within **each database**

1. Click on the title of the first article in your search results. This will bring you to the page that contains the abstract. Look for the **Set Alert, e-Alert or Feed (RSS)** button and create a citation alert. This will set up an email or RSS feed alert in that database that will notify you each time your article is cited by someone else. For example:

# You want to see how your original article has been received and discussed in the literature

The screenshot shows the Unitec Library website. The header features the Unitec logo and the word 'Library' in large white letters on a green background. Below the header is a navigation bar with links for 'LibrarySearch', 'About Us', 'Contact Us', 'Find Us', and 'Hours'. A left sidebar contains a menu with items like 'Home', 'Search', 'Subject Guides', 'Help and How to', 'Finding information', 'Online tutorials', 'Referencing', and 'Services'. The main content area is titled 'Citation Tracking' and includes a breadcrumb trail: 'Home > How to Research > Citation Tracking'. There is a 'SHARE' button with social media icons. The text explains that some databases allow tracking citations and provides a list of links for 'Google Scholar', 'Ebsco', 'Scopus', and 'Other Databases'. It also lists 'Limitations'. A paragraph describes when citation tracking is useful, followed by a list of reasons. Another paragraph mentions that there are databases for citation tracking. The 'Google Scholar' section includes a note about broad subject coverage and a list of steps to use the service.

LibrarySearch | About Us | Contact Us | Find Us | Hours

Home > How to Research > Citation Tracking

## Citation Tracking

Some databases allow you to track how many times your paper has been cited. This is useful for PBRF purposes. For further training, please contact your [Knowledge Specialist / liaison librarian](#).

- [Google Scholar](#)
- [Ebsco](#)
- [Limitations](#)
- [Scopus](#)
- [Other Databases](#)

Citation tracking is useful when you have a journal article of interest and you wish to see which subsequent articles have cited your original article. You can use citation tracking when:

- you want to see how your original article has been received and discussed in the literature
- you want to use your original article as a starting point for getting to other relevant articles

There are a number of databases which allow citation tracking.

### Google Scholar

\* Broad subject coverage

- Search for your original article.
- From the results list, click on the appropriate link, eg 'Cited by 15', to view the details of articles that have cited your original article.
- [Google Scholar Citations](#) allows you to keep track of citations to their articles, to check who is citing your publications, graph citations over time, and compute several citation metrics

# Determining the interdisciplinary value of a particular study

## Organizing Your Social Sciences Research Paper: Citation Tracking

The purpose of this guide is to provide advice on how to develop and organize a research paper in the social sciences.

- Purpose of Guide
- Types of Research Designs
- 1. Choosing a Research Problem
- 2. Preparing to Write
- 3. The Abstract
- 4. The Introduction
- 5. The Literature Review**
- 6. The Methodology
- 7. The Results
- 8. The Discussion
- 9. The Conclusion
- 10. Proofreading Your Paper
- 11. Citing Sources
  - Annotated Bibliography
  - Giving an Oral Presentation
  - Grading Someone Else's Paper
  - How to Manage Group Projects
- Writing a Book Review
  - Writing a Case Study
  - Writing a Field Report
  - Writing a Policy Memo
  - Writing a Research Proposal
  - Acknowledgements

### Definition

Citation tracking refers to a method of measuring the impact of research studies and/or for identifying leading scholars in a particular discipline based upon a systematic analysis of who has cited a particular study, how often a specific research study has been cited by others, and by exploring what disciplines are represented by those subsequent citations.

### Importance of...

Citation tracking can facilitate the review and evaluation of pertinent literature for the following reasons:

1. It can be an effective way of using a highly cited "landmark" or influential article to find more recent, related articles that cite the original work. It also can be an effective way of identifying important scholars in a particular field who have subsequently cited the work.
2. It can be a useful means for evaluating a study's "impact" within a particular discipline based upon the

### Managing Your Citations

- Organize and store your citations
- Share your citations with other researchers
- Create quick bibliographies
- Access your citations online from anywhere

For more information [go here](#).

Citation tracking is an excellent means of identifying the response of the academic community to individual articles.

## Citation tracking

### Learning Objectives

By the end of this module, you will be able to

- explain the principle of citation tracking.
- track citations using different tools.

### Why track citations?

Citation tracking is used to discover how many times a particular article has been cited by other articles. As a general rule, high quality articles attract a greater number of citations.

Citation counts are not perfect. They are influenced by a number of factors. Review articles (which survey a broad field of knowledge) are sometimes

**Definition**

Citation tracking refers to a method of measuring the impact of research studies and/or for identifying leading scholars in a particular discipline based upon a systematic analysis of how often a specific research study has been cited by others, who has cited a particular study, and by exploring what disciplines are represented by those subsequent citations.

**Importance of...**

**Citation tracking** can be an effective way to use a "landmark" or influential article to find more recent, related articles that cite that article. It also can be an effective way to identify who has subsequently cited the work of a leading scholar in a particular field.

When conducting your literature review, citation tracking can be a **particularly useful means for evaluating a study's "impact"** in a particular discipline based upon the number of times an author or article has been cited subsequently by others.

Managing Your Citations

### zotero

- Organize and store your citations
- Share your citations with other researchers
- Create quick bibliographies
- Access your citations online from anywhere

# The importance of citation tracking

The standard tool used in citation tracking is a citation index. Citation indexes allow you to search the academic literature in ways that show the progress of academic debate in your field. With a citation index, you can easily **identify the most influential articles**, and the leading academics in your field. You can track backwards (using lists of cited articles) and forwards (using lists of articles which cite a particular article). This means that you can determine the position of academic debate at any time in the past.

[See More at: http://www.une.edu.au/library/find/eskillsplus/literature/citation.php](http://www.une.edu.au/library/find/eskillsplus/literature/citation.php)

# Google Scholar Citations

- Google Scholar Citations provide a simple way for authors to keep track of citations to their articles. You can check who is citing your publications, graph citations over time, and compute several citation metrics.
- Source: <https://scholar.google.com/intl/en/scholar/citations.html>

# Keeping up-to-date

## What is an alert service?

- Many journal databases and book publishers offer free alert services. These are an effective means of keeping track of the latest research.
- Alert services come in different forms. The most common include:
  - a search alert. This is a saved search which alerts you when a book or article that matches your search terms is published.
  - a TOC (Table of Contents) alert. Such an alert notifies you when a new issue of a journal is published, and provides you with the issue's table of contents.
  - a citation alert. This advises you when a new article cites a particular work.
  - Most alert services are email-based. An increasing number are now offered as an RSS feed. If you are just beginning, you might like to try email alerts first. These are generally easier to create.

It is not vanity but a necessity to set up Google alerts (<http://www.google.com/alerts>) so you can automatically keep an eye on your developing presence and follow your online footprint and shadow.

# Keeping up-to-date

## Create a Google Alert

- Enter the topic you wish to monitor.

# The number of citations to one of my articles is too low.

**The number of citations to one of my articles is too low. I know of several articles citing it that are not included in the list of citations. What I can do to help fix this?**

Your "Cited by" counts come from the Google Scholar index. You can change the articles in your profile, but citations to them are computed and updated automatically as we update Google Scholar.

To change the "Cited by" counts in your profile, you would need to have them updated in Google Scholar. Google Scholar generally reflects the state of the web as it is currently visible to our search robots and to the majority of users. If some of the citations to your article are not included, chances are that the **citing articles are not accessible** to our search robots or **are formatted in ways that make it difficult** for our indexing algorithms to identify their bibliographic data or references.

To fix this, you'll need to identify the specific citing articles with indexing problems and work with the publisher of these articles to make the necessary changes (see our [inclusion guidelines](#) for details). For most publishers, it usually takes 6-9 months for the changes to be reflected in Google Scholar; for very large publishers, it can take much longer.

**Abstract**  
 Physical activity and aging research has burgeoned in the past few decades. Despite the increase in scholarly publications no attempts have been made to summarize the publication landscape and to identify works that had great impact to physical activity and aging research. We conducted a bibliometric analysis and collected publication data from 1980 to February 6, 2015 in the Web of Science Core Collection. Of the overall 9,935 publications most were published after 2007 and almost 60% were in the category of Geriatrics and Gerontology or Sport Sciences. [Hinhiv cited](#)
