Abstract

Abstract: In a competitive research landscape, researchers can no longer afford to just publish and hope for receiving impact. To leave a mark, researchers have to take their impact into their own hands. Researchers need to keep all of their scholarly output in a database, to share through academic social networking sites. Researchers also, should create a "permalink" for each of their publications. A "permalink" is a stable, permanent (or persistent) link to an online journal article or subscription resource, that can be accessed from any computer at any time. It is often different to the URL that appears at the top of your browser - the link displayed there may be session dependent, and will only work for a particular person in a particular time period. This presentation provides guidelines on how to create a publication database for enhancing research visibility and citations.

Keywords: H-index, Improve citations, Research tools, Bibliometrics, Reference management, Research impact, Research Visibility

Research Tools Mind Map

Gold Open Access Journals

- Journals that automatically and immediately make their articles available online to all at no cost (the articles are always free to read).
- Gold OA journals do not take copyright. They use Creative Commons licenses instead.

Green Open Access Journals

- Traditional, subscription-based journals that permit authors to self-archive their articles in OA repositories.
- In general, Green OA journals do take copyright, but “give back” some rights to the author.

Traditional Toll Access Journals

Subscription-based journals that require authors to transfer copyright to the Journal, which then has exclusive rights to the article.

Publishers and copyright

- Assigning copyright to a publisher does not generally mean that you cannot deposit in a repository
- Most publishers now permit authors to deposit a copy of their articles in repositories
- This is a right granted to authors over and above any copyright agreement you have signed
- However, most publishers will only allow you to deposit your 'author final version' of your work
- Some publishers have embargo periods, e.g. an article can only be deposited in a repository 6 months after publication

Source: [Morag Greig, Enlighten: Glasgow's University's online institutional repository](#)

Copyright issue

Your publication freely available

Besides the bibliographic details, you can add the publication itself to UvA-DARE, in pdf or Word. Of course, you yourself decide whether you only want to archive it (in which case the electronic version is not accessible) or if you wish to give interested researchers and readers full access to the electronic publication. There are great advantages to making it worldwide available. Publications which are freely available are most often downloaded and cited.

If your publisher does not give permission to give access to the definitive publisher's version/pdf, in many cases it is permitted to make the last author's version available (i.e. the version after peer review). This version has the same scientific content, but lacks the publisher's lay-out. More information can be found at [SHERPA/RoMEO](#) and the [Open Access and Copyright site](#) of UvA.

[Source: Digital Academic Repository of the University of Amsterdam](#)

Springer's Self-Archiving Policy

Springer is a green publisher, as we allow self-archiving, but most importantly we are fully transparent about your rights.

Publishing in a subscription-based journal

If you publish an article in the traditional way, without open access our Copyright Transfer Statements reads (excerpt): "Authors may self-archive the author's accepted manuscript of their articles on their own websites. Authors may also deposit this version of the article in any repository, provided it is only made publicly available **12 months after official publication or later**. He/ she may not use the publisher's version (the final article), which is posted on SpringerLink and other Springer websites, for the purpose of self-archiving or deposit. Furthermore, the author may only post his/her version provided acknowledgement is given to the original source of publication and a link is inserted to the published article on Springer's website. The link must be accompanied by the following text: *"The final publication is available at link.springer.com"*. "Prior versions of the article published on non-commercial pre-print servers like arXiv.org can remain on these servers and/or can be updated with the author's accepted version. The final published version (in PDF or HTML/XML format) cannot be used for this purpose. Acknowledgement needs to be given to the final publication and a link should be inserted to the published article on Springer's website, accompanied by the text "The final publication is available at link.springer.com".

[CTS \(for information purposes only\) \(pdf, 213 kB\)](#)

Publishing open access

If you publish your article open access, the final published version can be archived in institutional or funder repositories and can be made publicly accessible immediately.

[Open Access at Springer](#)

Is a Journal Green OA?

SHERPA/RoMEO

<http://www.sherpa.ac.uk/romeo/>

Search by journal/publisher to learn its copyright and self-archiving policies

Search - Publisher copyright policies & self-archiving

One publisher found when searched for: Publisher: **Elsevier**

Publisher:	Elsevier , United States
Journals:	(~1894 journals) (including journals with special policies) - involving 831 other organisations
RoMEO:	This is a RoMEO green publisher
Copyright:	Copyright Policy - Article Posting Policies - Rights & responsibilities - Funding Body Agreements - Green Elsevier Journal Specific Embargo Periods
Updated:	21-Oct-2013

These are the publisher's default policies. Individual journals may have special permissions, especially if they involve funding bodies. Always run a journal title or ISSN search to check.

Author's Pre-print:	✓ author can archive pre-print (ie pre-refereeing)
Author's Post-print:	✓ author can archive post-print (ie final draft post-refereeing)
Publisher's Version/PDF:	✗ author cannot archive publisher's version/PDF
General Conditions:	<ul style="list-style-type: none"> • Pre-print allowed on any website or open access repository • Voluntary deposit by author of authors post-print allowed on institutions open scholarly website in policy or mandate • Deposit due to Funding Body, Institutional and Governmental policy or mandate only allowed where permitted • Permitted deposit due to Funding Body, Institutional and Governmental policy or mandate, may be subject to conditions • Set statement to accompany deposit • Published source must be acknowledged • Must link to journal home page or articles' DOI • Publisher's version/PDF cannot be used • Articles in some journals can be made Open Access on payment of additional charge • NIH Authors articles will be submitted to PubMed Central after 12 months

One journal found when searched for: **international journal of nanomedicine**

Journal:	International Journal of Nanomedicine (ISSN: 1176-9114, ESSN: 1178-2013) [started 2009]
RoMEO:	This is a RoMEO blue journal
Listed in:	DOAJ as an open access journal
Author's Pre-print:	 author cannot archive pre-print (ie pre-refereeing)
Author's Post-print:	 author can archive post-print (ie final draft post-refereeing)
Publisher's Version/PDF:	 author can archive publisher's version/PDF
General Conditions:	<ul style="list-style-type: none"> • On institutional repository, central repository or subject -based repository, including PubMed Central • Creative Commons Attribution Non-Commercial License • UK funded authors may use a Creative Commons Attribution License • On a non-profit server • Must link to publisher version • Published source (journal and Dove Medical Press) must be acknowledged as original place of publication • Publisher's version/PDF may be used
Mandated OA:	(Awaiting information)
Notes:	<ul style="list-style-type: none"> • All titles are open access journals • Publisher last contacted on 20/04/2016

Find a stable URL

- For most e-journals, the web address ('URL') of the article that you see in the browser address bar is not stable; i.e. it may work for you right now, but it may not work tomorrow, and it might not work for other users. To make a link that will always lead your students to the correct article, you need to find a *stable URL* (also called a *persistent URL* or *permalink*).

Finding a permanent link

- **DOI permanent links**
 - Sometimes you will see only a DOI, and not a permanent link, when viewing the citation information for an article. A DOI is a standardized method for identifying an electronic object. DOIs often appear in the citation or the abstract of an article or even in its full-text format.
- When you have located a DOI, follow these steps to complete the link.
 - To convert the DOI to a URL, precede it with the following:
 - **http://dx.doi.org/** For example, the doi:10.1123/japa.2015-0188 becomes: <http://dx.doi.org/10.1123/japa.2015-0188> This is sufficient if the article is available for free.
- **Tip:** If you cannot find the DOI of an article, try using the following tool: <http://www.crossref.org/guestquery/>

How to Create Permanent Links to Online Articles

The Library subscribes to many databases that allow linking to full text articles. Instead of using the URL from your browser's address bar, which may quickly expire, you should create a permanent link. This link will provide a stable and permanent URL to a specific journal article, which can be used in online courses, reading lists or bibliographies.

Locate Permanent Link in Article

Find the desired article or journal page and look for a permanent link which may be provided by the publisher.

Look for words such as, "persistent URL", "stable URL", "infomark", "permanlink", "document URL", "durable link", "linking options for this record", or "DOI".

However, not all articles have permanent links.

If you are able to locate a DOI or other permanent link, you will need to create a ~~permanlink~~ [permanlink](#) for off-campus access.

Permanent Link Tools

- [Permanent Link Types for Research Databases](#)
- [Off-Campus Link Creator](#)
- [Off-Campus DOI Link Creator](#)
- [Free DOI Lookup](#)

Faculty and Instructors

See [Creating Course Reading Lists](#) for more advice on incorporating online readings into your course reading lists.

Cloud Storage

Storage Made Easy

The Storage Made Easy Enterprise File Share and Sync solution uniquely allows IT to regain control of 'cloud sprawl', unifying private and public file sharing into a single, converged storage infrastructure that can easily be managed and be used to set governance and audit controls.

- Good for creating a permanent link to the publications.
- [Example](#)

Jumpshare

Imagine if every file you share could be viewed online, if every desktop, smartphone and tablet could open the files irrespective of the platform they are running. No need to download the files, no need to install third-party apps to view them. Technology should do the work for you.

- Good for open view over 200 file formats online.
- [Example](#)

**Create Master List Folders for
your publications using
bibliographic/reference
management software**

[Library](#) » [Research Guides](#) » Calculate Your Academic Footprint[Admin Sign In](#)

Calculate Your Academic Footprint

Tags: [calculate your academic footprint](#), [citation tracking](#), [research impact](#)[About](#) [Author Profiles](#) [Find Publications \(Steps 1-2\)](#) [Track Citations \(Steps 3-6\)](#) [Count Citations \(Steps 7-11\)](#) [Your h-index](#) [Help](#)[Find Publications \(Steps 1-2\)](#) [Print Page](#)Search: This Guide

Step 1: Create Master List Folders

Create Master List Folders for your publications using bibliographic management software (such as RefWorks)

Begin by setting up a [RefWorks](#) account, and create a series of *Master List* folders titled as follows:

References Organize 8

You have 2 reference(s) not in folders. [Duplicates](#) not in fold

Share Entire Database (596)

Last Imported (23)

- ▶ [Master List - Articles - 1st Author](#) (15)
- ▶ [Master List - Articles - Co-author](#) (26)
- ▶ [Master List - Books & Book Chapters](#) (0)
- ▶ [Master List - Conference Proceedings](#) (12)
- ▶ [Master List - Other](#) (11)

Organizing publications in this way is key to the process offered by this guide!

NOTE

Master List - Other can be used for government

Steps 2 & 2.1: Find Your Publications

Identify databases containing your publications and that have citation-indexing functionality

Examples include:

- Web of Science, Scopus, Google Scholar
- IEEE Xplore, SPIE, SciFinder, AnthroSource
- ProQuest: Social Services Abstracts, etc (more [ProQuest databases](#))

Access the above tools via [Research Databases](#) by subject.

Step 2.1: Find your publications within a selected database

To locate your publications, you can search one article at a time OR you can capture all your publications in one search.

- For example, you can look for an *author search/author finder* option in the database. Enter your name as the database instructs (e.g. MacDonald M*). Use refinement options to narrow search, complete search and review results.

If you have a very common name OR are not listed, you can proceed with one of these options:

- Search for your last name and each article title, OR

Steps 2.2 & 2.3: Add Your Publications to RefWorks

Step 2.2: Export your publications' bibliographic information to RefWorks

Scopus

1. Select the citations you want to export by clicking the checkbox on the left hand side.

RefWorks export

[An exploration of online behi](#)

1

2. Select *RefWorks Export* and follow the prompts to access your RefWorks account.

Web of Science

1. Select the citations you want to export by clicking the checkbox on the left hand side.

Reference Management Tools

1. What is Reference Management Tool?

Reference Management Tools are software tools that can help you organize your references and citation, create reference lists/ bibliographies, collaborate with others online, and discover the latest research in your subject areas.

2. General Features

Maintain huge number of references for your dissertations or research projects

Manage, organize, cite and collaborate

Create and format references in various citation styles instantly

Import citations from databases, library catalogues, websites and more

Work on your references anytime, anywhere

Source: <https://www.lib.polyu.edu.hk/research-support/tools/ref-management-tools>

Why use a reference management tool

- Reference management tools saves time for researchers and help them work more efficiently;
- Reference management tools help scholars to create and manage their lists of references for research projects;
- Reference management tools should be tightly integrated into user's overall research workflows;
- Reference management tools are designed to organize citations into specific formats for the preparation of manuscripts and bibliographies.
- Reference management tools is needed to facilitate sharing and collaboration.

All Citation Management products have these basic features:

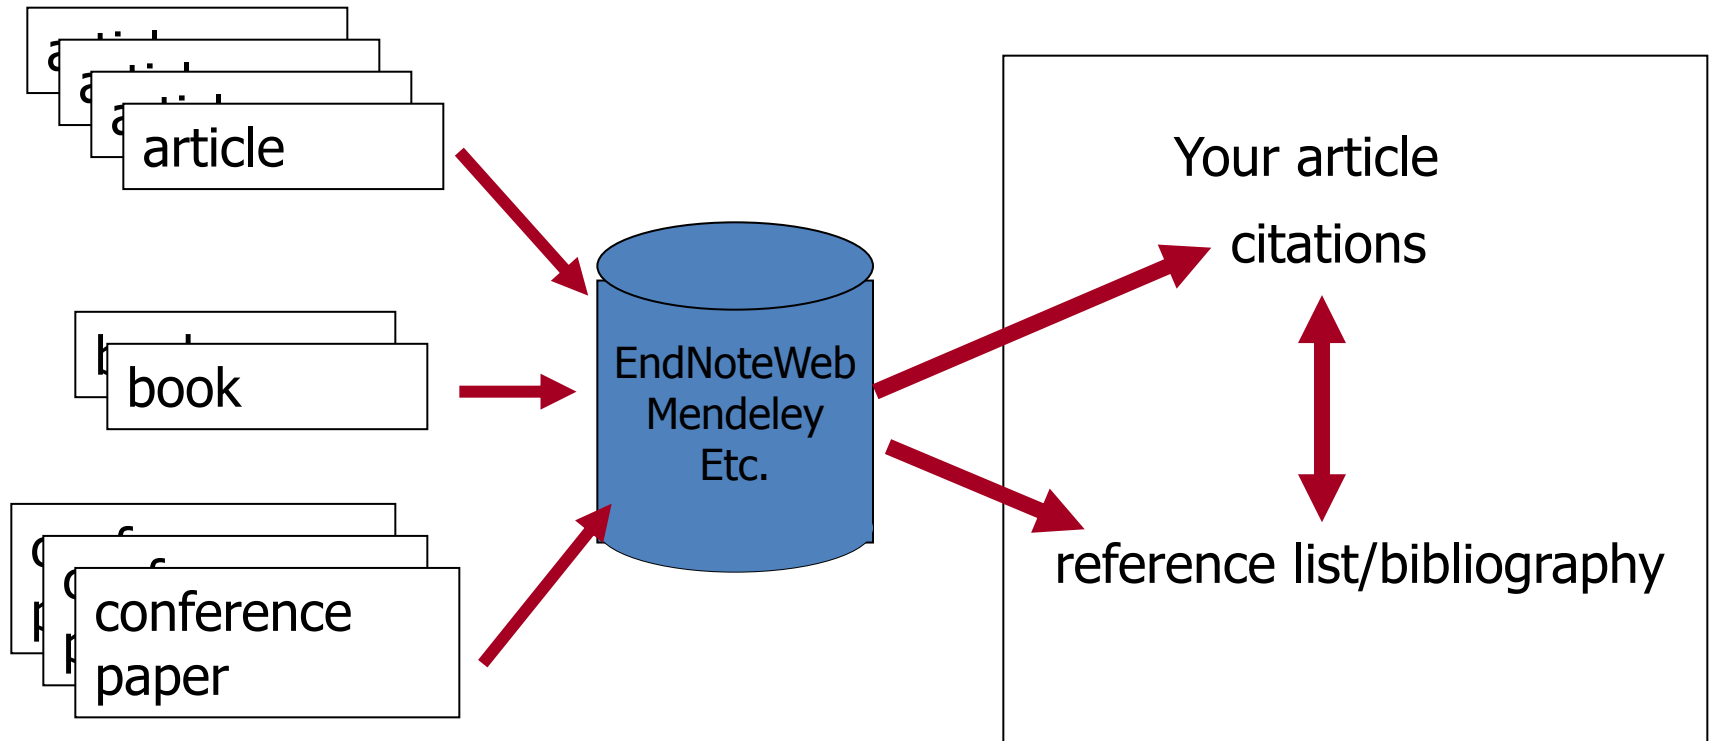

- Gather and transfer references from databases/resources/webpages into your personal research database
- Organize, annotate, sort and search your references, images and PDFs
- Insert in-text citations and reference lists into documents in a wide variety of styles (MLA, APA, etc)
- Create stand alone bibliographies in a wide variety of styles

Writing a Thesis/Paper: Traditional way

Use a reference management tool!

Source: Managing References: Mendeley By: HINARI Access to Research in Health

Mendeley

Mendeley is a free reference manager and academic social network that can help you organize your research, collaborate with others online, and discover the latest research.

This is the **Web version** of Mendeley which is used to manage your papers online.

EndNote

- *EndNote* is an almost indispensable tool for the serious researcher, and best of all, it's free to all UM postgraduates!

Why use *EndNote*?

- *EndNote* allows you to create your own reference library. This library can be used to store the bibliographical details relating to the articles and books that you use. When it comes time to write your thesis, you can employ the library to insert references into your text and produce your bibliography. *EndNote* will save you hundreds of hours over the course of your research.

Abstract
Physical activity and aging research has burgeoned in the past few decades. Despite the increase in scholarly publications no attempts have been made to summarize the publication landscape and to identify works that had great impact to physical activity and aging research. We conducted a bibliometric analysis and collected publication data from 1980 to February 6, 2015 in the Web of Science Core Collection. Of the overall 9,935 publications most were published after 2007 and almost 60% were in the category of Geriatrics and Gerontology or Sport Sciences. Highly cited
