Abstract

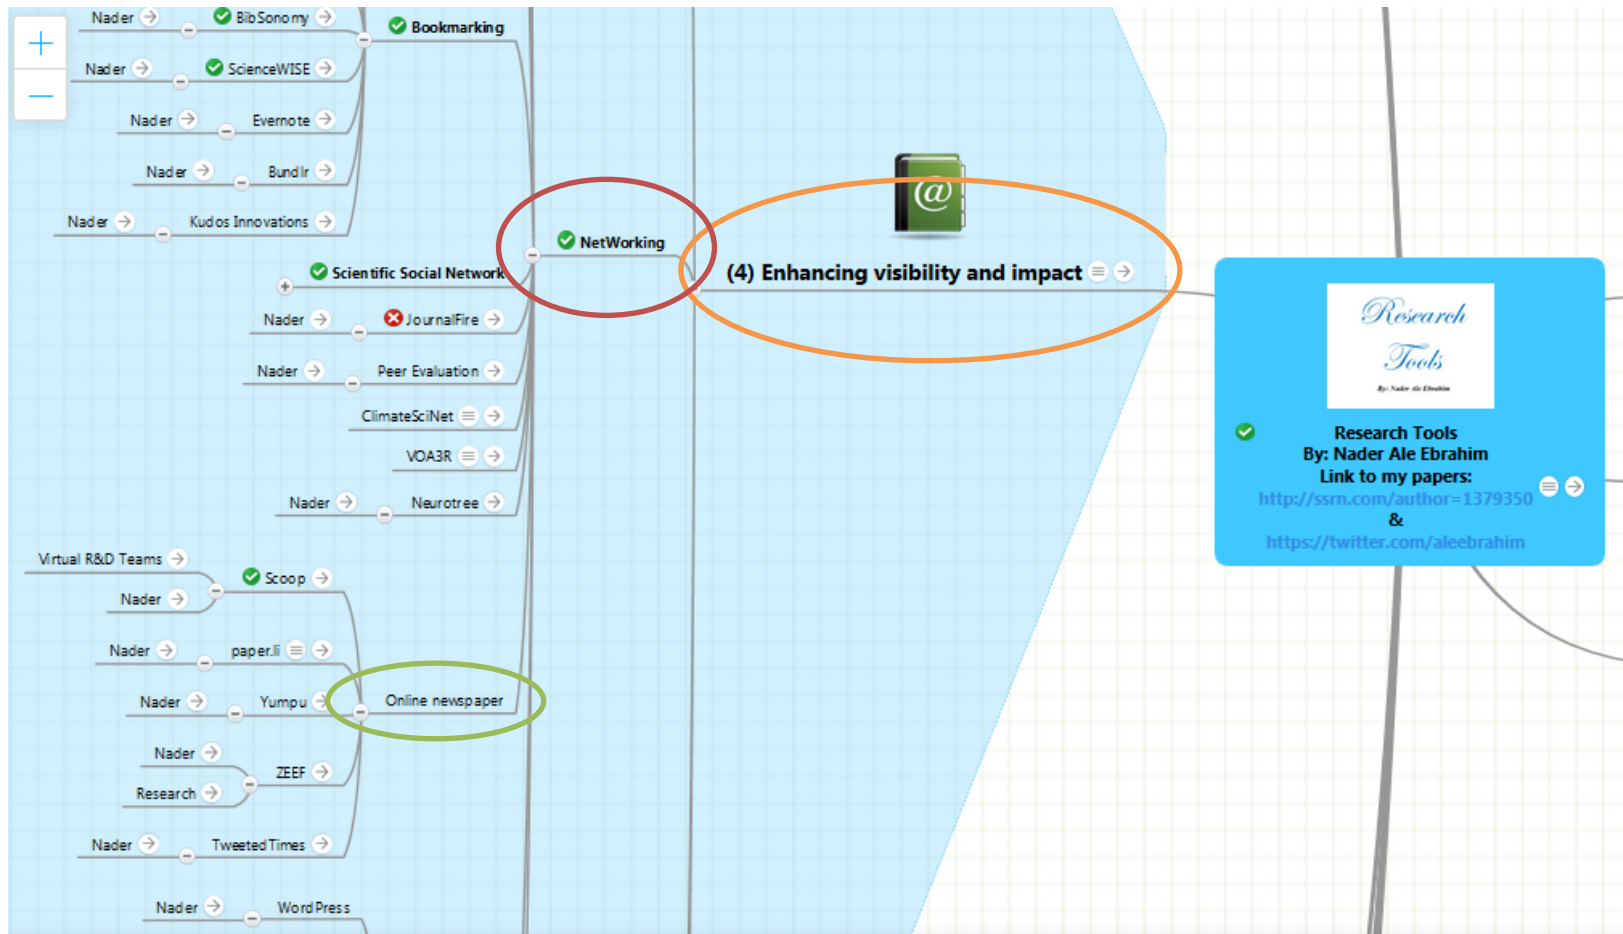

Abstract: The long run research findings will be disseminated through publications. However, researchers may have created some local content which should be circulated immediately. Online magazines can be one solution through content curation to immediately circulate the research findings. Content curation is not just sharing all kinds of content you stumble upon or source. It's most of all about doing it in a smart and audience-centric way, by focusing on specific topics you want to curate content about. This workshop introduce various tools on Publish online magazine (Content curation) to increase the visibility and enhance the impact of research work.

Keywords: H-index, Improve citations, Research tools, Bibliometrics, Content curation

Dr Philip Chappell

Lecturer

Ed.D; M.Ed; B.Comm

Philip Chappell has been involved in English Language Teaching, Language in Education/Applied Linguistics, ELT program management and TESOL since the early 1990s. He spent over ten years living in Asia, where he was involved with adult language teaching, language teacher education, curriculum development, program management, distance TESOL education and developing in-service professional development programs.

He currently conducts research in the areas of:

- TESOL Methodology
- Second Language Classroom Interaction

What is content curation?

“Content curation is the process of sorting through the vast amounts of content on the web and presenting it in a meaningful and organized way around a specific theme”.

Scoop.it: Content Curation & Content Marketing Software

The screenshot displays the Scoop.it user interface. At the top, the logo "Scoop.it" is on the left, and a navigation bar includes an "Upgrade" button, a menu icon, a search bar with "Scoops, topics, users", a search icon, a notification bell with "100", and a user profile for "Nader Ale Ebrahim" with "27.3K | +5".

On the left side, there is a "Paste a link to create a new scoop" input field with a green submit button. Below it are links for "Scoop without link", "Upload your own document", and "Get suggestions".

The main content area features a post by "Nader Ale Ebrahim" titled "Effective Strategies for Increasing Citation Frequency". The post includes a thumbnail image of a document and a quote: "Due to the effect of citation impact on The Higher Education (THE) world university ranking system, most of the researchers are looking for some helpful techniques to increase their citation record. This paper by reviewing the relevant articles extracts 33 different ways for increasing the citations possibilities. The results show that the article visibility has tended to receive more download and citations. This is probably the first study to collect over 30 different ways to improve the citation record. Further study is needed to explore and expand these techniques in specific fields of study in order to make the results more precisely." Below the quote is a section titled "Nader Ale Ebrahim's insight: Effective Strategies for Increasing Citation Frequency".

On the right side, there are two sections: "My Curated Topics" and "Recommended topics". "My Curated Topics" lists "Research Tools Box" with 31 suggestions and "Virtual R&D teams" with 2 suggestions, along with a "Create a Topic" button. "Recommended topics" shows "Bioinformatics Training" with a ribbon icon.

At the bottom left, there is a preview of a topic titled "Strategies to Enhance Research Visibility, Impact & Citations (17 topics)". The preview includes a colorful geometric pattern and text: "Do you know 'Over 43% of ISI papers has never received any citations?' (nature.com/top100, 2014). Publishing a high-quality paper in scientific journals is only halfway towards receiving the citation in the future. The rest of the journey is dependent on disseminating the publications via proper utilization of the...".

Abstract
 Physical activity and aging research has burgeoned in the past few decades. Despite the increase in scholarly publications no attempts have been made to summarize the publication landscape and to identify works that had great impact to physical activity and aging research. We conducted a bibliometric analysis and collected publication data from 1980 to February 6, 2015 in the Web of Science Core Collection. Of the overall 9,935 publications most were published after 2007 and almost 60% were in the category of Geriatrics and Gerontology or Sport Sciences. Highly cited
