# Abstract

**Abstract:** Reference Management tools offers an easy way of collecting references from online databases, organizing them in a database, and citing them in documents in Microsoft Word. Documents can be **shared** with colleagues/publish online. Reference Management tools offers ways to connect with other researchers that you can't find on other platforms. A reference management system can facilitate the keeping track of the literature.

**Keywords:** H-index, Improve citations, Research tools, Bibliometrics, Research Visibility

[See more at: http://as.exeter.ac.uk/it/equipmentandsoftware/software/frequent/referencemanager](http://as.exeter.ac.uk/it/equipmentandsoftware/software/frequent/referencemanager)

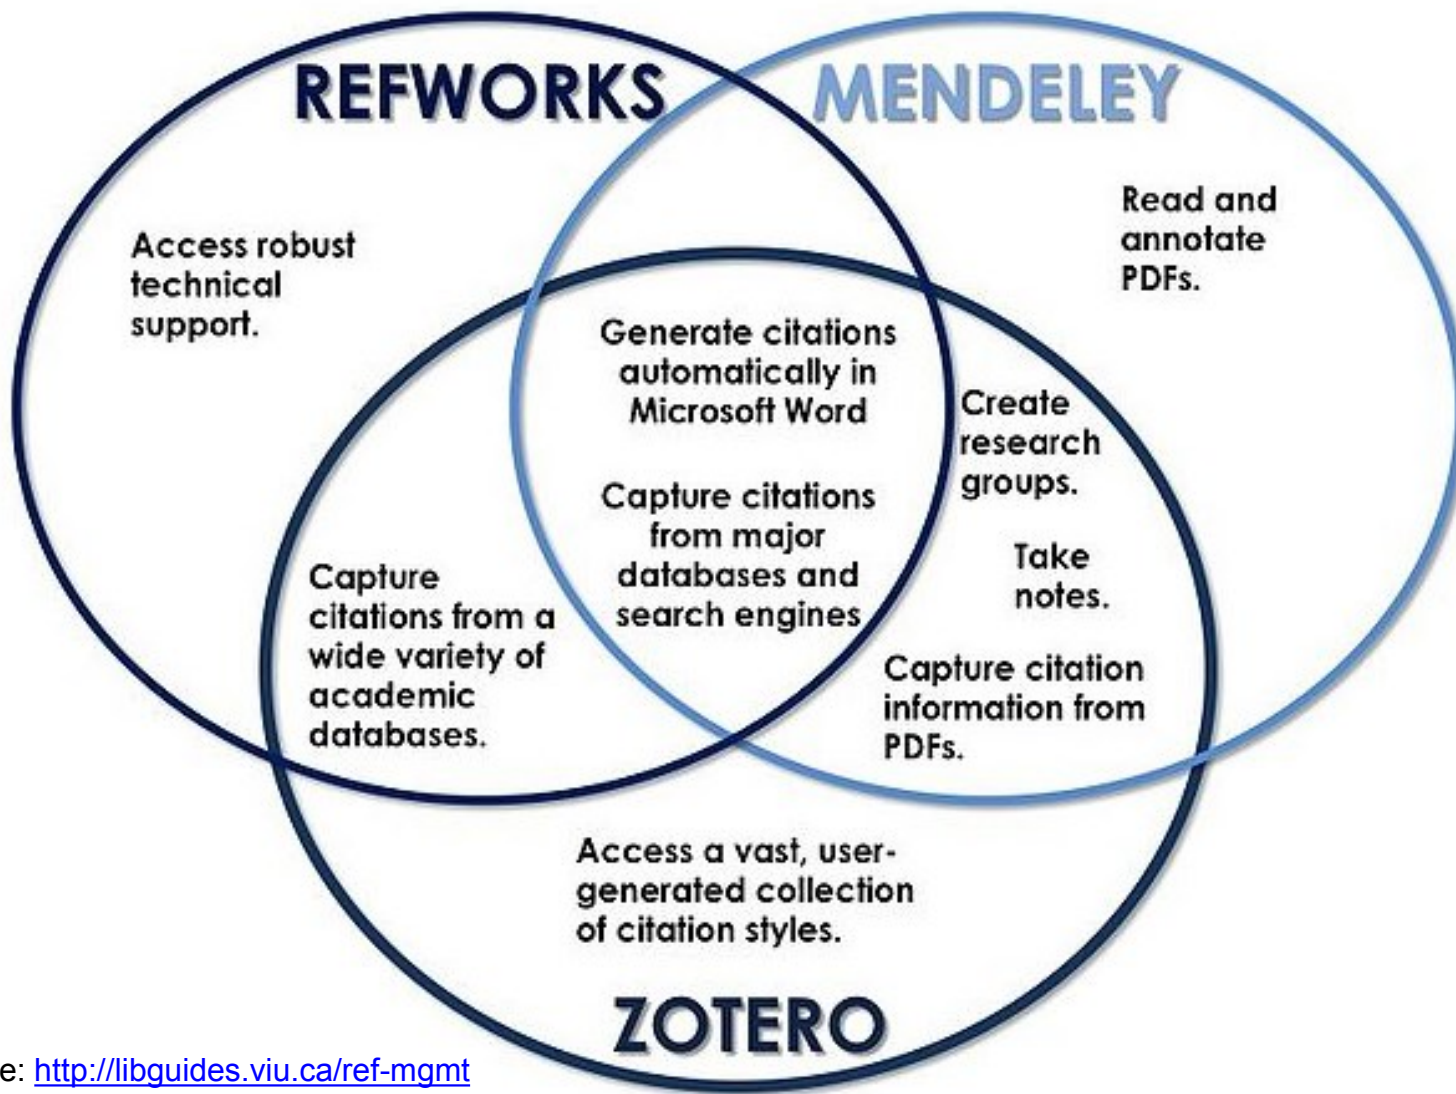

# Why use a reference management tool

- Reference management tools saves time for researchers and help them work more efficiently;
- Reference management tools help scholars to create and manage their lists of references for research projects;
- Reference management tools should be tightly integrated into user's overall research workflows;
- Reference management tools are designed to organize citations into specific formats for the preparation of manuscripts and bibliographies.
- **Reference management tools is needed to facilitate sharing and collaboration.**

# All Citation Management products have these basic features:

- Gather and transfer references from databases/resources/webpages into your personal research database
- Organize, annotate, sort and search your references, images and PDFs
- Insert in-text citations and reference lists into documents in a wide variety of styles (MLA, APA, etc)
- Create stand alone bibliographies in a wide variety of styles

# Use a reference management tool!

Source: Managing References: Mendeley By: HINARI Access to Research in Health

Easily organize your papers, read & annotate your PDFs, collaborate in private or open groups, and securely access your research from everywhere.

# Create a profile on Mendeley

The image shows the Mendeley website landing page. At the top left is the Mendeley logo, which consists of three stylized figures holding hands, followed by the word "MENDELEY" in a serif font. In the top right corner, there is a link "Have an account?" and a "Sign in" button. The main heading is "Your research, anywhere." followed by the subtitle "For students and researchers". Below this, a paragraph describes Mendeley as a free reference manager and academic social network, highlighting features like creating a fully-searchable library, citing as you write, and showcasing work. A prominent red button with the text "Create a free account" is circled in blue. At the bottom left, there is a section for downloading the app for free on various platforms, with icons for Apple, Windows, and Android, and the text "iOS". A white circle with a downward arrow is positioned over the spacebar of the laptop keyboard in the foreground.

# Import your publications

The screenshot shows a software application window with a menu bar (File, Edit, View, Tools, Help) and a search bar. The 'Import...' menu is open, and the option 'EndNote XML - EndNote v8, X1 to X3 (\*.xml)' is highlighted with a red circle. The main window displays a list of publications with the following columns: Author, Title, Year, Published In, and Added. The status bar at the bottom indicates '72% X Uploading files (5 of 431 - 1% done) 1.3 MB of current file sent'.

**jeroen bosman**

“ To find out whether scholarly workflows are changing we released a 8-12 min. graphical worldwide survey charting research tool usage. It permits testing many types of hypotheses regarding the relation between tool usage and field/country/academic role/career length. Please have a look and let me know what you think of it. I wonder what you would like to know regarding the use of (web based) research/communication tools.

### About this group

Owned by **Nader Ale Ebrahim**  
Ph.D. Student

Management Science / Operations ...

With the increasing use of information and communications technology (ICT), researchers are able to use computer software tools to find, organize, manipulate, analyze, and share relevant information. However, there are hundreds of such tools to select from, for various research-related uses. I have collected over 700 tools that can help researchers do their work efficiently. It is assembled as an interactive Web-based mind map, titled Research Tools, which is updated periodically.

# EndNote Web

- Using EndNote references from another computer, or share your references, you might use EndNote Web. Create an Web account in the “Sync and “Sync

in the  
references”

# Why *EndNote Web*?

*EndNote Web* can help you to manage your references in a simple two-steps process ...

- **Step 1: Manage references**
  - Collect references
  - Organize, share and collaborate
- **Step 2: Format references**
  - Cite references while writing (*Cite While You Write*)
  - Get reference list generated automatically
  - Change the reference style in few clicks!

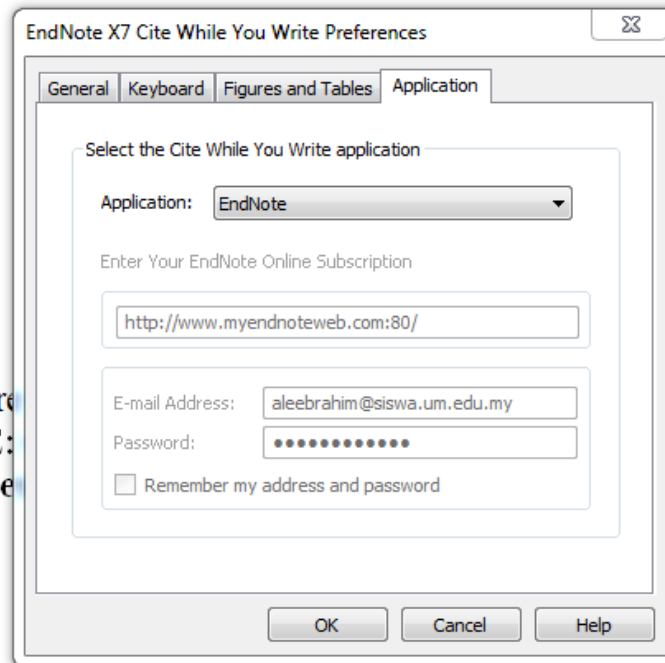

# How to start?

Here are the simple steps to make your writing experience a happier one ...

1. Create a **free** *EndNote Web* account
2. Collect references from *Web of Science* and various databases
3. Manage, organize and share references
4. Download and installing the “*Cite While You Write*” Plug-in (only do it once!)
5. Inserting your references and **be a happy writer!**  
... because references are automatically generated and you can change the style with just few clicks!

# EndNote Web in Word

- In Word you can change from EndNote or EndNote web in “Preferences” > “Application”

# Share references

- You can share your references (but only bibliographic data not PDF's) in EndNote Web.
- You can share your references with Dropbox

**ENDNOTE®**

**Abstract**  
Physical activity and aging research has burgeoned in the past few decades. Despite the increase in scholarly publications no attempts have been made to summarize the publication landscape and to identify works that had great impact to physical activity and aging research. We conducted a bibliometric analysis and collected publication data from 1980 to February 6, 2015 in the Web of Science Core Collection. Of the overall 9,935 publications most were published after 2007 and almost 60% were in the category of Geriatrics and Gerontology or Sport Sciences. Highly cited
