Abstract

Abstract: A curriculum vitae (CV) allows you to showcase yourself and your academic and professional achievements in a concise and effective way. Creating an online CV, presenting who you are to your academic and professional peers. Creating and maintaining your online CV is an essential tool in enhancing your research and publications visibility. Enhancing the visibility empowers the researchers to gain recognition in their fields and beyond, communicate their research to a wider audience and grow their networks. In this presentation one of the newest online CV. platform named Wikiscientist will be introduced.

Keywords: Wikiscientist, H-index, Improve citations, Research tools, Bibliometrics

Author Identification Systems

Author name disambiguation and the association of scholarly works with the correct author have long been a problem for those wishing to develop a comprehensive list of publications for individuals.

[Source: A. B. Wagner, "Author Identification Systems," *Issues in Science and Technology Librarianship*, 2009.](#)

The Challenge at Hand

- Inconsistent name formats caused by the authors themselves or editors
- Various transliteration systems, especially where different non-Roman alphabet names result in the same transliterated Roman alphabet name.
- Legal name changes
- Cultural variants in the position of surnames
- Compound or hyphenated names
- The sheer volume of scholarly materials
- Highly similar names sometimes even doing similar work at the same institution.
- The large number of common names, especially certain surnames in many cultures.

[Source: A. B. Wagner, "Author Identification Systems," *Issues in Science and Technology Librarianship*, 2009.](#)

Why should I care about my online presence?

- To make your research and teaching activities known
- To increase the chance of publications getting cited
- To correct attribution, names and affiliations
- To make sure that as much as possible is counted in research assessments
- To increase the chance of new contacts for research cooperation
- To increase the chance of funding
- To serve society better

Which academic research caught the public imagination in 2014?

2014 Top 100

Which academic research caught the public imagination in 2014?

At Altmetric, we track who's saying what about academic papers. Here, we take a look back at 2014, with a review of the 100 papers that received the most attention online - and the conversations that happened around them.

You can find out more about how we collect data and put this list together on our [blog](#).

Why online CV.?

Increased access to publications leads to higher visibility and thus increased impact.

Source: [Morag Greig, Enlighten: Glasgow's University's online institutional repository](#)

Maximize Usage through Dissemination

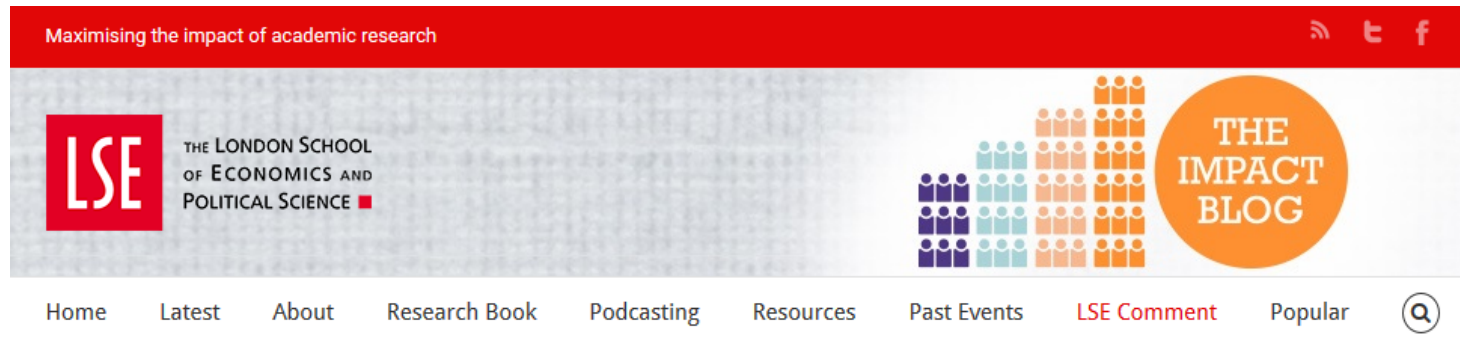

- **Add a link to your article on your signature file and link to the Abstract.**

- **Add links to your articles on your own website, your institution's site or repository, bulletin boards and discussion lists.**

Including hyperlinks in your CV can make a big difference.

The digital scholar and the academic job market: Including hyperlinks in your CV can make a big difference.

How can academics ensure their job application stands out from the rest? **Patrick Dunleavy** advocates going fully digital, where clearly clickable and open-access hyperlinks are provided for all your publications, writings and alternative outputs. Alongside the ease this provides the selection committee, adding digital links to all your recent top research articles will reassure UK selectors that your research falls under the HEFCE open access mandates for the next REF.

The rules governing academic CVs and résumés are complex. And they are generally different from those applying to all other spheres of the job market. In particular academic CVs often look as if they are lagging decades behind those in other sectors of life. Researchers still mostly operate with documents designed for paper printing only, set out in conservative ways and devoid of any digital

ORCID (“orkid”)

= **O**pen **R**esearcher and **C**ontributor **ID**

NOT:

“ORCID is like a DOI for researchers.”

What is ORCID ?

The ORCID Organization

- Non-profit, non-proprietary, open, and community-driven
- Global, interdisciplinary
- Supported by the membership of organizations using the ORCID API
 - Funding organizations
 - Professional societies
 - Universities & research institutes
 - Publishers

The ORCID iD

- Unique, persistent identifier for researchers & scholars
- Free to researchers
- Can be used throughout one's career, across professional activities, disciplines, nations & languages
- Embedded into workflows & metadata
- API enables interoperability between siloed systems

EBSCO Information Services joins ORCID

The logo for EBSCO, featuring the word "EBSCO" in white, bold, sans-serif capital letters on a dark blue rectangular background.

INFORMATION SERVICES

IPSWICH, Mass. — October 22, 2013 — [EBSCO Information Services](#) (EBSCO) announces it is now a member of [Open Researcher and Contributor ID](#) (ORCID), an open, non-profit, community-driven effort to create and maintain a registry of unique and persistent researcher identifiers. ORCID works with the community to embed these identifiers in research workflows and systems to connect researchers with their scholarly activities and contributions.

Strategies to Enhance Research Visibility, Impact &
Citations ©2015 Nader Ale Ebrahim

Why get an ORCID identifier?

Benefits of getting an ORCID iD include:

- Ensuring researchers get credit for their work
- Reducing time to identify scholarly output (see “Publisher integration,” below)
- Enabling scholars to keep track of and report on their work with funders, publishers and institutions
- Repurposing data for use in CV generation, citation repositories, BU Profiles, annual reports, faculty web-sites, and other systems (see “Grant submission integration,” below)
- Tying individuals to their scholarly work should make finding academic papers easier and more accurate

Publisher integration: Elsevier, Thomson Reuters, Nature and other major publishers have begun integrating ORCID iDs into the manuscript submission process, and embedding ORCID identifiers across their scientific and scholarly research ecosystem. This will save authors time during submission, and enable automatic updating of author bibliographies when articles are published. That information can be ingested into BU systems, at each scholar’s discretion.

Grant submission integration: NIH, NSF and other federal agencies are planning to integrate ORCID iDs into the ScienCV platform, for linking researchers, their grants, and their scientific output. The US federal government has been working to create a fed-wide profile system to streamline the grants and contract application process and reduce the data entry burden for investigators, and ORCID holds promise to be part of the solution.

Why use ORCID

A more illustrative example: **Jens Åge Smærup Sørensen**

- | | | |
|--------------------------------|---------------------------------|--------------------------------------|
| ■ <u>J. Å. S. Sørensen</u> | ■ <u>J. Åge S. Sørensen</u> | ■ <u>J. Åge Smærup Sørensen</u> |
| ■ <u>J. Aa. S. Sørensen</u> | ■ <u>J. Aage S. Sørensen</u> | ■ <u>J. Aage Smaerup Sørensen</u> |
| ■ <u>J. Å. S. Sorensen</u> | ■ <u>J. Åge S. Sorensen</u> | ■ <u>J. Åge Smarup Sorensen</u> |
| ■ <u>J. Aa. S. Sorensen</u> | ■ <u>J. Aage S. Sorensen</u> | ■ <u>J. Aage Smarup Sorensen</u> |
| ■ <u>J. Å. S. Soerensen</u> | ■ <u>J. Åge S. Soerensen</u> | ■ <u>J. Åge Smaerup Soerensen</u> |
| ■ <u>J. Aa. S. Soerensen</u> | ■ <u>J. Aage S. Soerensen</u> | ■ <u>J. Aage Smaerup Soerensen</u> |
| ■ <u>Jens Å. S. Sørensen</u> | ■ <u>Jens Åge S. Sørensen</u> | ■ <u>Jens Åge Smærup Sørensen</u> |
| ■ <u>Jens Aa. S. Sørensen</u> | ■ <u>Jens Aage S. Sørensen</u> | ■ <u>Jens Aage Smaerup Sørensen</u> |
| ■ <u>Jens Å. S. Sorensen</u> | ■ <u>Jens Åge S. Sorensen</u> | ■ <u>Jens Åge Smarup Sorensen</u> |
| ■ <u>Jens Aa. S. Sorensen</u> | ■ <u>Jens Aage S. Sorensen</u> | ■ <u>Jens Aage Smarup Sorensen</u> |
| ■ <u>Jens Å. S. Soerensen</u> | ■ <u>Jens Åge S. Soerensen</u> | ■ <u>Jens Åge Smærup Soerensen</u> |
| ■ <u>Jens Aa. S. Soerensen</u> | ■ <u>Jens Aage S. Soerensen</u> | ■ <u>Jens Aage Smaerup Soerensen</u> |

And on and on it goes ...

The 36 faces of **Jens Åge Smærup Sørensen: diphthongs**, accents, contractions and transliterations produce dozens of variations in a hypothetical name. By claiming a unique ORCID, researchers can avoid fragmentation of identity and identity ambiguity. (Slide by Mogens Sandfær of DEFF)

Wikiscientist

Wikiscientist is a **FREE** platform funded by wiki program. The Wikiscientist platform enables worldwide scientists to:

1. *Build online personal academic biography*
2. Share research interests, research findings
3. Record academic publication history
4. Demonstrate academic publication list
5. Find and connect with researchers, academics, scientists in the same fields in a worldwide scope.
6. To be invited as a reviewer in peer review papers
7. To be invited in as chair in international conferences

It is a free directory that anyone can edit. You can edit your [profile here](#).

Virtual R&D Teams: A New Model for Product Development

Nader Ale Ebrahim

Abstract

Increased global competitions have urged small and medium enterprises (SMEs) to develop new products faster. Virtual research and development (R&D) teams in SMEs can offer a solution to speed up time-to-market of new product development (NPD). However, factors that affect the effectiveness of virtual teams for NPD are still not adequately verified. This paper presents the correlations between virtual R&D team constructs and virtual team effectiveness by developing a "Virtual Research and Development Team" (VIR&DT) model. The items, which may influence the
