7-	Which	set of	words	complete	the gaps	of the	following	statement:

interchange (i) interchangeably (iii) interchangeable (ii) interchanged (iv)

- 1. The words 'arithmetic-logic' and 'arithmetic-logical' can be used
- 2. There is often an of ideas among computer scientists.
- 3. There is a big difference between an input and an output. These cannot be.....

1. (i) (iii) (iv)

2. (iii) (i) (iv)

3. (ii) (i) (iv)

4. (iv) (i) (ii)

8- The gap of which statement is completed using prefix de-?

- 1. The complete description of the logical structure of data is called the schema and the description of the parts, the schema.
- 2. The main storage locations of a computer are called itsary storage.
- 3. The small ferrite rings called cores have two states: they can be either magnetized or magnetized.
- 4. The introduction of chips or conductor memories made it possible to reduce the size of the computer.

9-Which of the following statements is true?

- 1. Intelligent agents do not make computers seem more like humans.
- 2. Networking is a way of allowing otherwise incompatible systems to communicate and share
- 3. The use of computers prevents people from being creative.
- 4. Computer users do not have much influence over the way that computing develops.

10- The term "Information superhighway" means:

- 1. Use computers to stay in touch with the office while working at home.
- 2. Internet system designed to provide free, interactive access to vast resources for people all over the world.
- 3. Multimedia materials with a combination of educational and entertainment content.
- 4. A combination of text with sound, video, animation and graphics.

11- Th	e term	" Cleansed	data	'' means:
--------	--------	------------	------	-----------

- 1. Storage method of archiving large amounts of data to make it easy to access
- 2. Data free from duplicate and erroneous information
- 3. A process of filtering through large amounts of raw data for useful information
- 4. A computing tool that tries to operate in a way similar to the human brain

12-	The analysi	t passes ti	he final	results to	o the	make	rs who	decid	e on th	ıe	action.
-----	-------------	-------------	----------	------------	-------	------	--------	-------	---------	----	---------

1. program fitting

2. decision appropriate

3. assessment correct

- 4. result right
- 13- An operating system kernel on its own isn't a lot of use; but Linux was purposefully designed as a near-clone of and there is a lot of software out there that is free and was designed to compile on Linux.
 - 1. GNU
- 2. ATET
- 3 Unix
- 4. JAVA

14- Which of the following words is a synonym for the word coarse?

- 1. shiny
- 2. rough
- 3. roughy
- 4. glittery

15- Which of the following statements is true?

- 1. Keyboards and mice will soon not be required for using personal computers.
- 2. Speech recognition is likely to completely replace other input devices.
- 3. Computer speech and vision will free the user from having to sit in front of a keyboard and screen.
- 4. Intelligent agents do not make computers seem more like humans.

16- The term "Multimodal interface" means:

- 1. Software assistant that performs tasks such as retrieving and delivering information and automating repetitive tasks.
- 2. A system that allows a user to interact with a computer using a combination of inputs such as speech recognition, hand writing recognition, text to speech and etc.
- 3. Graphical user interface.
- 4. Text to speech.
